9706/21

9706 ACCOUNTING

Paper 2 (Structured Questions – Core),
maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Red Tape Robin Ellison, 2018-06-14 Red Tape tells the sometimes astonishing story of the making of laws both good and bad the recent explosion in rule making and the failure of repeated attempts to rationalise the statute books even governments themselves are concerned about the increasing number and complexity of our laws Society requires the rule of law but the rule of too much law means that the general public faces frustrating excesses created by overzealous regulators and lawmakers Robin Ellison reveals the failure of repeated attempts to limit the number and complexity of new laws and the

expansion of regulators He challenges the legislature to introduce fewer yet better laws and regulators by encouraging lawmakers to adopt practices which improve the efficiency of the law and the lives of everyone Too much law leads to frustration for all Red Tape is a long overdue expos of our legal system for practitioners and consumers alike Shadow Networks Francisco Louçã, Michael Ash, 2018-10-03 The 2007-08 financial crisis surprised many economists and the public But how did the crisis come about why was it so deep and why has the clean up been so slow and painful Many accounts of the crisis focus on renegade activity in marginal financial sectors Shadow Networks challenges this pervading view and sets out to demonstrate that far from a dissident branch the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank based finance The collapse was not an accident but baked into the system of finance from the start Shadow Networks traces the complex web of power that caused crisis and gives vivid descriptions of the actors in the quarter century leading up to 2007 to explain how the now decade long crisis took shape Shadow Networks Financial Disorder and the System that Caused Crisis is a probing examination of the roles of the powerful elite It traces the networks and institutions that support a finance focused market centered model of economy and society from their ascendancy to their surprising resilience in the face of manifest failures
