A Mind So Rare Merlin Donald, 2002 Donald psychology Queen's University Canada challenges the prevailing view that seeks to explain away human consciousness and presents a theory on the origins of the modern mind He describes the cultural and neuronal forces that power human modes of awareness and proposes that the human mind is a hybrid product of the interweaving of the brain with an invisible symbolic web of culture to form a distributed cognitive network Using evidence from brain and behavioral studies of humans and animals he explains how an expansion of consciousness transcends the limitations of the mammalian mind and elaborates the foundations of self evaluation and self reflection c Book News Inc

Developing the Hall of Human Origins Shelley L. Smith, 2024-09-10 This book focuses on the development of the National Museum of Natural History's David H Koch Hall of Human Origins As one of the most visited human evolution exhibits in the world and the largest such exhibit in the United States it has tremendous influence on public perception and knowledge of human evolution The chapters explore how this exhibit came about how it has changed since opening and the associated educational and public outreach activities of members of the Smithsonian's Human Origins Program The author uses the term adaptive resilience to describe a central theme of the exhibit our species adaptation to changing environments as a key feature of our success and

to refer to the resilience of Richard B Potts in creating his vision for the hall Contextual sections situate the hall's development within the history of paleoanthropology the politics of evolution and climate change and African contributions The book will be of particular interest to scholars of anthropology and museum studies as well as the history of science and science communication *T.C. Memorandum Decisions* United States. Tax Court,1979 Memorandum - ,1966 The Dream and Human Societies G. E. Von Grunebaum,Roger Caillois,2023-07-28 The study of dreams and their role in human societies particularly within classical Islam provides a fascinating lens through which to understand both individual and collective psychology In medieval Islamic culture dreams were seen not only as personal experiences but as profound communications from the divine or supernatural This belief system imbued the dream with cognitive power often interpreting dreams as forms of prophecy or divine messages a view that transcended the individual's inner psyche and extended into the realm of objective truth Dreams were considered a bridge to understanding the future the Hereafter and the will of God with scholars like Abdalghani an N bulus developing elaborate systems for interpreting their meanings These interpretations drew heavily from religious texts such as the Koran and Hadith and offered guidance on a variety of matters ranging from personal conduct to political affairs The significance of dreams within classical Islam is also evident in their societal and political implications Dreams were not only seen as personal revelations but also as instruments of prophecy often used to predict the death of rulers the success of military campaigns or the outcomes of political struggles They were deeply intertwined with religious doctrines with the Prophet Muhammad and various saints appearing in dreams to guide or advise key figures in Islamic history These dream visions were viewed as essential tools for navigating both the personal and political spheres reinforcing the belief that the dream world was closely linked with the divine order The widespread acceptance of dreams as a form of truth is a striking contrast to contemporary Western thought where dreams are more commonly seen as reflections of the subconscious mind In this sense the historical and cultural context of classical Islam elevated the dream to a status that intertwined it with both personal and societal identity suggesting a powerful intersection of religion politics and individual experience This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1966 The Importance of Being Educable Leslie Valiant,2024-04-16 In the age of AI why our future depends on better understanding what makes us human We are at a crossroads in history If we hope to share our planet successfully with one another and the AI systems we are creating we must reflect on who we are how we got here and where we are heading The Importance of Being Educable puts forward a provocative new exploration of the extraordinary facility of humans to absorb and apply knowledge The remarkable educability of the human brain can be understood as an information processing ability It sets our species apart enables the civilization we have and gives us the

power and potential to set our planet on a steady course Yet it comes hand in hand with an insidious weakness While we can readily absorb entire systems of thought about worlds of experience beyond our own we struggle to judge correctly what information we should trust In this visionary book Leslie Valiant argues that understanding the nature of our own educability is crucial to safeguarding our future After breaking down how we process information to learn and apply knowledge and drawing comparisons with other animals and AI systems he explains why education should be humankind's central preoccupation Will the unique capability that has been so foundational to our achievements and civilization continue to drive our progress or will we fall victim to our vulnerabilities If we want to play to our species' great strength and protect our collective future we must better understand and prioritize the vital importance of being educable This book provides a road map

Our Human Herds Stephen Martin Fritz, 2020-09-04 Our Human Herds presents a new theory in moral and political philosophy called dual morality The theory proposes that just as the physical senses of sight smell taste touch and hearing evolved to help us navigate our physical environment two independent moral senses evolved to guide us to success in our social world One prioritizes cooperation the other competition The first bases moral justification on the egalitarianism that emphasizes our equal worth the other finds moral justification in the inequalities that allow us to distinguish better from worse Liberal and conservative are merely the names given to the political manifestations of these two forms of moral expression just as socialist and capitalist describe their economic manifestations and personality and character their psychological ones Our Human Herds addresses what it means to be a human being why we fight about the things that divide us and why we unite behind the ideas that draw us together The book examines all aspects of human social behavior revealing how and why we often disagree in our approaches to education history war crime pleasure happiness politics science and religion This is a learned thoroughly researched study and dazzlingly bright The effervescent approach to writing makes its pages fly by Studies as brilliant as this one deserve a far wider audience An engrossing and mind expanding examination of morality Kirkus Reviews Book Review A vast philosophical study charts the shifting moral landscape while tackling the weightiest question of human existence what is the meaning of life Humanity's moral framework remains in a constant state of reconstruction As the author points out in his opening chapter Two hundred years ago if a woman was raped and became pregnant we'd kill the rapist and spare the baby Today we spare rapist and kill the baby Centuries ago many cultures condoned polygamy today we put people in jail for it Over the course of this weighty tome which is just shy of 1 000 pages the author ponders what morality is with an emphasis on humans as grouping or herding creatures and the causes of its flux and reflux Furthermore there is an attempt to reconcile opposing philosophical theories by introducing a new conceptual model called Dual Morality proposed as an all encompassing blueprint of human morality The study is logically structured divided into four sections The Theory of Dual Moralism The Explanation including investigations of the group and the self The Derivations which considers family country religion and science nature technology and finally The
