Drone Operations in United Kingdom Eugen Toma, Unmanned aircraft systems UAS commonly referred to as drones have rapidly become a vital tool across the United Kingdom From recreational hobbyists flying for fun to professional operators conducting inspections surveys and emergency response missions drones are reshaping the way we work play and interact with the airspace In the U K drone operations are regulated by the Civil Aviation Authority CAA The CAA s role is to ensure that drone activities are carried out safely responsibly and in compliance with aviation law Unlike in some countries where regulations differ significantly between commercial and recreational flying the U K has adopted a risk based framework that applies rules consistently depending on the category of operation rather than whether the flight is commercial or hobby This means that whether you are a filmmaker flying for business a surveyor collecting data or simply a recreational flyer enjoying your drone at a park the same fundamental safety principles apply However professional and higher risk operations require additional authorizations training and risk assessments
