**The Composer As Intellectual** Jane F. Fulcher, 2005-08-25 In *The Composer as Intellectual* musicologist Jane Fulcher reveals the extent to which leading French composers between the World Wars were not only aware of but also engaged intellectually and creatively with the central political and ideological issues of the period. Employing recent sociological and historical insights she demonstrates the extent to which composers particularly those in Paris since the Dreyfus Affair considered themselves and were considered to be intellectuals and interacted closely with intellectuals in other fields. Their consciousness raised by the First World War and the xenophobic nationalism of official culture some joined parties or movements allying themselves with and propagating different sets of cultural and political social goals. Fulcher shows how these composers furthered their ideals through the specific language and means of their art rejecting the dominant cultural exclusions or constraints of conservative postwar institutions and creatively translating their cultural values into terms of form and style. This was not only the case with Debussy in wartime but with Ravel in the twenties when he became a socialist and unequivocally refused to espouse a narrow exclusionary nationalism. It was also the case with the group called Les Six who responded culturally in the twenties and then politically in the thirties when most of them supported the programs of the Popular Front. Others could not be enthusiastic about the latter and largely excluded from official culture sought out more compatible movements or returned to the Catholic Church. Like many French Catholics they faced the crisis of Catholicism in the thirties when the church not only supported Franco but Mussolini's imperialistic aggression in Ethiopia. While Poulenc embraced traditional Catholicism Messiaen turned to more progressive Catholic movements that embraced modern art and insisted that religion must cross national and racial boundaries. Fulcher demonstrates how closely music had become a field of clashing ideologies in this period. She shows also how certain French composers responded and how their responses influenced specific aspects of their professional and stylistic development. She thus argues that from this perspective we can not only better understand specific aspects of the stylistic evolution of these composers but also perceive the role that their art played in the ideological battles and in heightening cultural political awareness of their time.

*The Man Who Broke Michelangelo's Nose* Felipe Pereda, 2024-08-20 Renaissance sculptor Pietro Torrigiano has long held a place in the public imagination as the man who broke Michelangelo's nose. Indeed he is known more for that story than for his impressive prowess as an artist. This engagingly written and deeply researched study by Felipe Pereda a leading expert in the field teases apart legend and history and reconstructs Torrigiano's work as an artist. Torrigiano was in fact one of the most fascinating characters of the sixteenth century. After fighting in the Italian wars under Cesare Borgia the Florentine artist traveled across four countries working for such patrons as Margaret of Austria in the Netherlands and the Tudors in England. Torrigiano later went to Spain where he died in prison accused of heresy by the Inquisition for breaking a sculpture of the Virgin and Child that he had made with his own hands. In the course of his travels Torrigiano played a crucial role in the

dissemination of the style and the techniques that he learned in Florence and he interacted with local artisanal traditions and craftsmen developing a singular terracotta modeling technique that is both a response to the authority of Michelangelo and a unique testimony to artists mobility in the period As Pereda shows Torrigiano s life and work constitute an ideal example to rethink the geography of Renaissance art challenging us to reconsider the model that still sees the Renaissance as expanding from an Italian center into the western periphery , **Les Debuts de l'architecture de la Renaissance (1418-1440)** Marcel Reymond,1900 **La sculpture florentine: Le XVI<sup>e</sup> siècle et les successeurs de l'école florentine** Marcel Reymond,1900 An Introduction to the French Language Alphonse Naus Van Daell,1893 *Art as experience of the living body / L'art comme expérience du corps vivant* Christine Vial Kayser,2024-01-23 This book analyses the dynamic relationship between art and subjective consciousness following a phenomenological pragmatist and enactive approach It brings out a new approach to the role of the body in art not as a speculative object or symbolic material but as the living source of the imaginary It contains theoretical contributions and case studies taken from various artistic practices visual art theatre literature and music Western and Eastern the latter concerning China India and Japan These contributions allow us to nourish the debate on embodied cognition and aesthetics using theory philosophy art history neuroscience and the authors personal experience as artists or spectators According to the Husserlian method of reduction and pragmatist introspection they postulate that listening to bodily sensations cramps heartbeats impulsive movements eye orientation can unravel the thread of subconscious experience both active and affective that emerge in the encounter between a subject and an artwork an encounter which following John Dewey we deem to be a case study for life in general Ce livre analyse la relation dynamique entre l'art et la conscience subjective selon une approche phénoménologique pragmatiste et enactive Il vise faire merger une nouvelle approche du rôle du corps dans l'art non pas comme objet spéculatif ou matériau symbolique mais comme source vivante de l'imaginaire Les contributions théoriques et les études de cas sont prises diverses pratiques artistiques arts visuels théâtre littérature et musique occidentales et orientales ces dernières concernant la Chine l'Inde et le Japon Selon la méthode husserlienne de réduction en cho l'introspection pragmatiste les textes témoignent que l'écoute des sensations corporelles crampes battements de cœur mouvements pulsionnels orientation des yeux mises en jeu par l'œuvre permet de dénouer le fil de l'expérience inconsciente la fois kinesthésique et affective qui merge dans la rencontre entre un sujet et une œuvre d'art une rencontre comprise la manière de Dewey comme un cas d'école de la vie en général Professional training of archivists International Council on Archives,2017-10-23 No detailed description available for Professional training of archivists **Description raisonnée des sculptures du Moyen Age, de la Renaissance et des temps modernes: Renaissance française [par] M. studies conceptions of space that were implicitly or explicitly entailed by ancient medieval and early modern representations of the cosmos The authors reassess Alexandre Koyr s groundbreaking work *From the Closed World to the Infinite Universe* 1957 and they trace the permanence of arguments to be found throughout the Middle Ages and beyond By adopting a long timescale this book sheds new light on the continuity between various cosmological representations and their impact on the ontology and epistemology of space Readers may explore the work of a variety of authors including Aristotle Epicurus Henry of Ghent John Duns Scotus John Wyclif Peter Auriol Nicholas Bonet Francisco Su rez Francesco Patrizi Giordano Bruno Libert Froidmont Marin Mersenne Pierre Gassendi Gottfried Wilhelm Leibniz and Samuel Clarke We see how reflections on space imagination and the cosmos were the product of a plurality of philosophical traditions that found themselves confronted with and enriched by various scientific and theological challenges which induced multiple conceptual adaptations and innovations This volume is a useful resource for historians of philosophy those with an interest in the history of science and particularly those seeking to understand the historical background of the philosophy of space
