

HTML and CSS

What is HTML and CSS? HTML is the language of the web, and CSS is the language of style.

What is HTML and CSS? HTML is the language of the web, and CSS is the language of style.

HTML (Hypertext Markup Language) is the standard language for creating web pages. It is a markup language that uses a series of tags to structure and format content on the web. CSS (Cascading Style Sheets) is a style sheet language used for describing the presentation of a document written in HTML. It is a declarative language that allows you to control the layout, colors, and fonts of a web page.

HTML and CSS are the two main technologies used to create web pages. HTML is responsible for the structure and content of a page, while CSS is responsible for the visual appearance. Together, they form the foundation of web development. Understanding HTML and CSS is essential for anyone looking to create a professional-looking website. There are many resources available to help you learn these technologies, including books, online courses, and tutorials. This book is a comprehensive guide to HTML and CSS, covering everything you need to know to get started. It includes detailed explanations of the syntax and semantics of both languages, as well as practical examples and exercises to help you practice what you've learned.
