Neurorehabilitation Volker Dietz, Nick S. Ward, 2020-05-28 Neurorehabilitation is an expanding field with an increasing clinical impact due to an ageing population. During the last 20 years, neurorehabilitation has developed from a discipline with little scientific background, separated from other medical centers, to a medical entity largely based on the principles of evidenced-based medicine with strong ties to basic research and clinical neurology. Today, neurorehabilitation is still a work in progress and treatment standards are not yet established for all aspects of the field. There are very few books that address contemporary neurorehabilitation from this perspective. This new edition of the Oxford Textbook of Neurorehabilitation provides an understanding of the theoretical underpinnings of the subject as well as a clear perspective on how and why to approach treatment decisions on an individualized basis. The book has been thoroughly updated to reflect novel important developments in the field and includes new chapters on vocational rehabilitation, self-management strategies in neurorehabilitation, and music-supported therapy in neurorehabilitation. This indispensable book will be of great interest to rehabilitation physicians, neurologists, and allied health care professionals who look after patients requiring neurorehabilitation.

Electro Physical Agents E-Book Tim Watson, Ethne Nussbaum, 2020-03-17 Electrophysical Modalities formerly Electrotherapy: Evidence-Based Practice is back in its 13th edition, continuing to uphold the standard of clinical research and evidence base for which it has become renowned. This popular textbook comprehensively covers the use of electrotherapy in clinical practice and includes the theory which underpins that practice. Over recent years, the range of therapeutic agents involved and the scope for their use have greatly increased, and the new edition includes and evaluates the latest evidence and most recent developments in this fast-growing field. Tim Watson is joined by co-editor Ethne Nussbaum, and both bring years of clinical research and teaching experience to the new edition with a host of new contributors, all leaders in their specialty.

Textbook of Cosmetic Dermatology Robert Baran, Howard I. Maibach, 2017-02-24 This text documents the science that lies behind the expanding field of cosmetic dermatology so that clinicians can practice with confidence and researchers can be fully aware of the clinical implications of their work. New chapters have been added to this edition on photodamage, actinic keratoses, UV lamps, hidradenitis suppurativa, age-related changes in male skin, changes in female hair with aging, nonablative laser rejuvenation, and cryolipolysis, and chapters have been updated throughout to keep this at the forefront of work and practice. The Series in Cosmetic and Laser Therapy is published in association with the Journal of Cosmetic and Laser Therapy. Print versions of this book also include access to the ebook version.

Transcutaneous Electrical Nerve Stimulation (TENS) Mark I. Johnson,2014-03-06 Transcutaneous electrical nerve stimulation TENS is a technique that delivers mild electrical currents across the intact surface of the skin to reduce pain TENS is used by practitioners throughout the world to manage painful conditions and TENS equipment can be purchased by the general public so that they can self administer treatment There are thousands of experimental and clinical research studies published on TENS and related techniques yet there is uncertainty about the best way to administer TENS in clinical practice This is because currents used during TENS can be administered in a variety of ways and the findings of research studies have been inconclusive This book provides guidance on how best to use TENS based on an evaluation of current research evidence The book covers what TENS is how it works and safe and appropriate clinical techniques for many conditions including chronic low back pain osteoarthritis and cancer pain It also offers solutions to the problems faced by researchers when trying to design clinical trials on TENS Accessibility written Transcutaneous Electrical Nerve Stimulation TENS provides a comprehensive coverage of research issues and findings about TENS and will be essential reading for healthcare professionals practitioners and students **Therapeutic Modalities** Kenneth Knight,Kenneth L. Knight,David O. Draper,2012-02-15 Authored by two leading researchers in the athletic training field the Second Edition of Therapeutic Modalities The Art and Science provides the knowledge needed to evaluate and select the most appropriate modalities to treat injuries The authors use an informal student friendly writing style to hold students interest and help them grasp difficult concepts The unique approach of the text teaches aspiring clinicians both the how and the why of therapeutic modality use training them to be decision making professionals rather than simply technicians The Second Edition is revised and expanded to include the latest research in therapeutic modalities New material has been added on evidence based practice and other areas such as pain treatment are significantly expanded It retains the successful format of providing the necessary background information on the modalities followed by the authors 5 Step Application Procedure New photos illustrations and case studies have also been added
