Guide Field Museum of Natural History, 1910 **Guide to Southern Africa**, 1896 **African Antelope Database 1998** Rod East, 1999 Although most antelope species still exist in large numbers in sub Saharan Africa some in hundreds of thousands up to three quarters of the species are in decline Threats to their survival arise from the rapid growth of human and livestock populations with consequent degradation and destruction of natural habitats and excessive offtake by meat hunters In addition some parts of Africa are now almost completely devoid of large wild animals because of uncontrolled slaughter during recent civil wars This report presents the information currently held by the IUCN SSC Antelope Specialist Group on the conservation status of each antelope species and selected subspecies in sub Saharan Africa Key areas have been identified for the conservation of representative antelope communities While external donors make the greatest contributions to the conservation of antelopes greater recognition of wildlife conservation in national and regional development plans is often a critically important requirement

**Antelopes** David P. Mallon, Steven Charles Kingswood, 2001. Antelope herds numbering in the tens of thousands formerly occurred across the steppes and semideserts of Eurasia and India, but these have nearly all been reduced to fractions of their earlier size. Antelope populations are now fragmented across the region, and during recent decades several species have disappeared altogether. Threats include hunting, loss of habitat, population fragmentation, inadequate protected area coverage, poorly developed administrative structures, under-resourcing of conservation programmes and lack of enforcement of existing legislation. Rising human population growth and economic development constantly increase pressure on land and natural resources. There is a consequent need for integrated rural development and community-based conservation projects which have the full participation of local people at the planning and execution stages. This publication, Part 4 of the Global Antelope Survey, covers 37 countries in the region, and actions to conserve antelope populations are listed in each country report.

**Stuarts' Field Guide to National Parks & Nature Reserves of SA** Chris Stuart, 2018-01-01. Information details the history, location, landscape, geology, vegetation, with maps and wildlife (mammals, birds, reptiles, amphibians, fish and insects) of each reserve. Text panels list the highlights and provide key facts about each park's wildlife, climate, facilities and activities, as well as critical warnings for visitors. More than 900 colour photographs support the text. Detailed park maps indicate places of interest, including where to view particular animals. At the back of the book is a concise pictorial ID guide featuring the birds, mammals, amphibians, reptiles, flowers and trees most commonly seen in the reserves. This is a handy, informative must-have guide to South Africa's famously diverse and richly populated parks and reserves.
