planning and execution. The emphasis is on the importance of the commander's role. Finally, the planning requirements and assessing success of information collection is measured by its contributions to the commander's understanding, visualization and decisionmaking abilities. With the exception of cyberspace all operations will be conducted and outcomes measured by effects on populations. This increases the complexity of information collection planning, execution and assessment and requires more situational understanding from commanders. The staff is part of information collection activities and every Soldier collects and reports information. This field manual cannot provide all the answers. Its purpose is to prompt the user to ask the right questions. This FM complies with Doctrine 2015 guidelines. Chapter 1 provides the Army definition of information collection and its relation to the joint construct of intelligence, surveillance and reconnaissance. Chapter 2 examines the roles and actions of the commander and staff in information collection planning and execution. This chapter also discusses the working group for information collection. Chapter 3 describes information collection planning and information collection activities assessment. Chapter 4 discusses information collection tasking and directing. The operations staff integrates collection assets through a deliberate and coordinated effort across all warfighting functions. Tasking and directing is vital to control limited collection assets. Chapter 5 provides an overview of the information collection assets and capabilities available to Army commanders. Chapter 6 examines joint intelligence, surveillance and reconnaissance activities. Appendix A provides instructions for preparing Annex L Information Collection in Army plans and orders.

### **The Operations Process**

Department of the Army, 2010-03-26. The six chapters and its associated ten appendixes of this edition of field manual FM 5-0 The Operations Process constitute the Army's view on planning, preparing, executing and assessing operations. Together with FM 6-0 Mission Command, Command and Control of Army Forces, this manual provides the Army with a common philosophy and language for the exercise of command and control throughout the conduct of operations. This version of FM 5-0 increases the scope of the manual over previous versions from strictly a manual on planning and orders production to a manual that addresses all activities of the operations process. It describes how commanders with support from their staffs drive the operations process through battle command, the art and science of understanding, visualizing, describing, directing, leading and assessing operations to accomplish missions. This change intends to better describe the dynamic relationship among the commander, staff, subordinate commanders and their staffs and other military and civilian partners throughout the operations process, not just planning. In addition, FM 5-0 incorporates design within the operations process. Design is an approach to critical and creative thinking that assists commanders in understanding, visualizing and describing complex problems and developing approaches to manage or solve them. To comprehend the doctrine contained in FM 5-0, readers must first understand the fundamentals of full spectrum operations described in FM 3-0 Operations. In addition, readers must be familiar with FM 3-90 Tactics, FM 3-07 Stability Operations and JP 3-28 Civil Support. They must understand how offensive, defensive and stability or civil support operations complement each other. Readers must also understand the fundamentals of

command and control addressed in FM 6 0 and the fundamentals of leadership addressed in FM 6 22 Army Leadership This manual applies to all Army forces The principal audience for this manual is Army commanders and unit staffs officers noncommissioned officers and Soldiers Commanders and staffs of Army headquarters serving as a joint task force or a multinational headquarters should also refer to applicable joint or multinational doctrine for the exercise of command and control Trainers and educators throughout the Army also use this manual Terms that have joint or Army definitions are identified in both the glossary and the text Glossary references The glossary lists most terms used in FM 5 0 that have joint or Army definitions Terms for which FM 5 0 is the proponent field manual the authority are indicated with an asterisk in the glossary Text references Definitions for which FM 5 0 is the proponent field manual are printed in boldface in the text These terms and their definitions will be incorporated into the next revision of FM 1 02 Operational Terms and Graphics For other definitions in the text the term is italicized and the number of the proponent manual follows the definition FM 5 0 applies to the Active Army the Army National Guard Army National Guard of the United States and the United States Army Reserve unless otherwise stated
