*The Archaean Geology of the Kaapvaal Craton, Southern Africa* Alfred Kröner, Axel Hofmann, 2019-02-20 This book provides a comprehensive overview of the evolution of one of the oldest and best exposed Archaean cratons on this planet There is currently a renewed interest in the early Earth and the Kaapvaal craton has long served as a model for early crustal evolution This unique multidisciplinary resource features information on geology tectonics geochemistry and geochronology It offers a wealth of new data on various aspects of the craton as well as contributions on the various crustal units by international specialists

*South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of

their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Dyke Swarms of the World:

A Modern Perspective Rajesh K. Srivastava, Richard E. Ernst, Peng Peng, 2018-11-19 Continuing the tradition of International Dyke Conference this book is largely based on contributions from the IDC7 but also includes some chapters by invitation It focuses on mafic dyke swarms and related associations e g links with sills kimberlites syenites carbonatites and volcanics discussing the following themes i regional maps reviews of dyke swarms and related units ii the role of giant dyke swarms in the reconstruction of supercontinents paleocontinents iii mapping of dykes using remote sensing techniques iv geochronology of dyke swarms v petrology geochemistry and petrogenesis of dykes vi emplacement mechanism of dykes vii dyke swarms and planetary bodies and viii links to mineralization and resources Economics of South African Townships Sandeep Mahajan, 2014-08-25 Countries everywhere are divided within into two distinct spatial realms one urban one rural Classic models of development predict faster growth in the urban sector causing rapid migration from rural areas to cities lifting average incomes in both places The situation in South Africa throws up an unconventional challenge The country has symptoms of a spatial realm that is not not rural not fully urban lying somewhat in limbo This is the realm of the country s townships and informal settlements T IS In many ways the townships and especially the informal settlements are similar to developing world slums although never was a slum formed with as much central planning and purpose as were some of the larger South African townships And yet there is something distinct about the T IS For one thing unlike most urban slums most T IS are geographically distant from urban economic centers Exacerbated by the near absence of an affordable public transport system this makes job seeking and other forms of economic integration prohibitively expensive Motivated by their uniqueness and their special place in South African economic and social life this study seeks to develop a systematic understanding of the structure of the township economy What emerges is a rich information base on the migration patterns to T IS changes in their demographic profiles their labor market characteristics and their access to public and financial services The study then look closely at Diepsloot a large township in the Johannesburg Metropolitan Area to bring out more vividly the economic realities and choices of township residents Given the current dichotomous urban structure modernizing the township economy and enabling its convergence with the much richer urban centers has the potential to unleash significant productivity gains Breaking out of the current low level equilibrium however will require a comprehensive and holistic policy agenda with significant complementarities among the major policy reforms While the study tells a rich and coherent story about development patterns in South African townships and points to some broad policy directions its research and analysis will generally need to be deepened before being translated into direct policy action Ancient Supercontinents and the Paleogeography of Earth Lauri J. J Pesonen, Johanna Salminen, Sten-Ake Elming, David A.D. A.D. Evans, Toni Veikkolainen, 2021-10-06 Ancient Supercontinents and the Paleogeography of Earth offers a systematic examination of Precambrian cratons and supercontinents Through detailed maps of drift histories and paleogeography of each continent this book examines topics related to Earth s tectonic evolution prior to Pangea including plate kinematics

orogenic development and paleoenvironments Additionally this book discusses the methodologies used principally paleomagnetism and tectonostratigraphy and addresses geophysical topics of mantle dynamics and geodynamo evolution over billions of years Structured clearly with consistent coverage for Precambrian cratons this book combines state of the art paleomagnetic and geochronologic data to reconstruct the paleogeography of the Earth in the context of major climatic events such as global glaciations It is an ideal up to date reference for geoscientists and geographers looking for answers to questions surrounding the tectonic evolution of Earth Provides robust paleogeographies of Precambrian cratons based on high quality paleomagnetic and geochronologic data and critically tested by global geological datasets Includes links to updated databases for the Precambrian such as PALEOMAGIA and the Global Paleomagnetic Database GPMDB Presents full color maps of the drift histories of each continent as well as their paleogeographies Discusses key questions regarding continental drift the supercontinent cycle and the geomagnetic dipole hypothesis and analyzes palaeogeography in the context of Earth s holistic evolution
