Flicker Theodore Roszak, 2005-04-01 From the golden age of art movies and underground cinema to X rated porn splatter films and midnight movies this breathtaking thriller is a tour de force of cinematic fact and fantasy full of metaphysical mysteries that will haunt the dreams of every moviegoer Jonathan Gates could not have anticipated that his student studies would lead him to uncover the secret history of the movies a tale of intrigue deception and death that stretches back to the 14th century But he succumbs to what will be a lifelong obsession with the mysterious Max Castle a nearly forgotten genius of the silent screen who later became the greatest director of horror films only to vanish in the 1940s at the height of his talent Now 20 years later as Jonathan seeks the truth behind Castle's disappearance the innocent entertainments of his youth the sexy sirens the screwball comedies the high romance take on a sinister appearance His tortured quest takes him from Hollywood's Poverty Row into the shadowy lore of ancient religious heresies He encounters a cast of exotic characters including Orson Welles and John Huston who teach him that there's more to film than meets the eye and journeys through the dark side of nostalgia where the Three Stooges and Shirley Temple join company with an alien god whose purposes are anything but entertainment

Flashes of Light Jami, 2010-11 The renowned Persian thinker and poet Abd al Rahman al Jami 1414 92 CE wrote his *Flashes of Light* to explain the intuitions and verities displayed on the pages of the hearts and minds of men of insight and divine knowledge Each section of his work consists of a discussion in prose and a portion in verses Jami provides one of the best synthetic introductions to Sufi spirituality Publisher's website *Flicker & Burn* T.M. Goeglein, 2013-08-20 Sara Jane Rispoli is still searching for her missing family but instead of fighting off a turncoat uncle and crooked cops this time she finds herself on the run from creepy beings with red pulsing eyes and pale white skin chasing her through the streets in ice cream trucks they can only be described as Ice Cream Creatures They're terrifying and hell bent on killing her but they're also a link to her family a clue to where they might be and who has them While she battles these new pursuers she's also discovering more about her own cold fury and more about the Chicago Outfit how the past misdeeds old murders and vendettas might just be connected to her present and the disappearance of her family But connecting the dots is tough and time consuming and may finally be the undoing of her relationship with the handsome Max who's now her boyfriend But for his own safety Sara Jane may have to end this relationship before it even really starts Her pursuers who've shown her her mother's amputated finger and the head of the Chicago Outfit who's just whistled her in for a sit down make a romance unthinkable The only thing that matters is finding her family and keeping everyone she loves alive

The Flickering Mind Todd Oppenheimer, 2004-12-07 *The Flickering Mind* by National Magazine Award winner Todd Oppenheimer is a landmark account of the failure of technology to improve our schools and a call for renewed emphasis on what really works American education faces an unusual moment of crisis For decades our schools have been beaten down by a series of curriculum fads empty crusades for reform and stingy funding Now education and political leaders have offered their biggest and most expensive promise ever the miracle of computers and the Internet at a cost of approximately 70 billion just during the decade of the 1990s Computer technology has become

so prevalent that it is transforming nearly every corner of the academic world from our efforts to close the gap between rich and poor to our hopes for school reform to our basic methods of developing the human imagination Technology is also recasting the relationships that schools strike with the business community changing public beliefs about the demands of tomorrow's working world and reframing the nation's systems for researching testing and evaluating achievement All this change has led to a culture of the flickering mind and a generation teetering between two possible futures In one youngsters have a chance to become confident masters of the tools of their day to better address the problems of tomorrow Alternatively they can become victims of commercial novelties and narrow measures of ability underscored by misplaced faith in standardized testing At this point America's students can't even make a fair choice They are an increasingly distracted lot Their ability to reason to listen to feel empathy is quite literally flickering Computers and their attendant technologies did not cause all these problems but they are quietly accelerating them In this authoritative and impassioned account of the state of education in America Todd Oppenheimer shows why it does not have to be this way Oppenheimer visited dozens of schools nationwide public and private urban and rural to present the compelling tales that frame this book He consulted with experts read volumes of studies and came to strong and persuasive conclusions that the essentials of learning have been gradually forgotten and that they matter much more than the novelties of technology He argues that every time we computerize a science class or shut down a music program to pay for new hardware we lose sight of what our priority should be enlightened basics Broad in scope and investigative in treatment *The Flickering Mind* will not only contribute to a vital public conversation about what our schools can and should be it will define the debate
