Intelligent Environments 2009 V. Callaghan, A. Kameas, A. Reyes, 2009-07-07 As computers are increasingly embedded into our everyday environments the objects therein become augmented with sensors processing and communication capabilities and novel interfaces The capability for objects to perceive the environment store and process data pursue goals reason about their intentions and coordinate actions in a holistic manner gives rise to the so called Intelligent Environment IE In such environments real space becomes augmented with digital content thus transcending the limits of nature and of human perception The result is a pervasive transparent infrastructure capable of recognizing responding and adapting to individuals in a seamless and unobtrusive way The realization of Intelligent Environments requires the convergence of different disciplines such as information and computer science building architecture material engineering artificial intelligence sociology art and design The 5th International Conference on Intelligent Environments IE 09 held at the Polytechnic University of Catalonia Castelldefels Barcelona Spain provides a multidisciplinary forum for researchers and engineers from across the world to present their latest research and to discuss future directions in the area of Intelligent Environments The IE 09 proceedings contain the complete conference program including full papers presented at special sessions and short papers from the doctoral colloquium and poster session In addition three thought provoking invited lectures on topics of current and future IE research are included Progress in Pattern Recognition, Image Analysis, Computer Vision, and Applications Eduardo Bayro-Corrochano, Jan-Olof Eklundh, 2009-11-16 The 14th Iberoamerican Congress on Pattern Recognition CIARP 2009 C gresoIberoAmericano de Reconocimiento de Patrones formed the latest of a now long series of successful meetings arranged by the rapidly growing Iberoamerican pattern recognition community The conference was held in Guadalajara Jalisco Mexico and organized by the Mexican Association for Computer Vision Neural Computing and Robotics MACVNR It was sponsored by MACVNR and several other Iberoamerican PR societies CIARP 2009 was like the previous conferences in the series supported by the International Association for Pattern Recognition IAPR CIARP 2009 attracted participants from all over the world presenting state of the art research on mathematical methods and computing techniques for pattern recognition computer vision image and signal analysis robot vision and speech recognition as well as on a wide range of their applications This time the conference attracted participants from 23 countries 9 in Iberoamerica and 14 from other parts of the world The total number of submitted papers was 187 and after a serious review process 108 papers were accepted all of them with a scientific quality above overall mean rating Sixty four were selected as oral presentations and 44 as posters Since 2008 the conference is almost single track and therefore there was no real grading in quality between oral and poster papers As an acknowledgment that CIARP has established itself as a high quality conference its

proceedings appear in the Lecture Notes in Computer Science series Moreover its visibility is further enhanced by a selection of a set of papers that will be published in a special issue of the journal Pattern Recognition Letters Artificial Intelligence-based Infrared Thermal Image Processing and its Applications U. Snehalatha,K. Palani Thanaraj,Kurt Ammer,2022-09-28 Infrared thermography is a fast and non invasive technology that provides a map of the temperature distribution on the body s surface This book provides a description of designing and developing a computer assisted diagnosis CAD system based on thermography for diagnosing such common ailments as rheumatoid arthritis RA diabetes complications and fever It also introduces applications of machine learning and deep learning methods in the development of CAD systems Key Features Covers applications of various image processing techniques in thermal imaging applications for the diagnosis of different medical conditions Describes the development of a computer diagnostics system CAD based on thermographic data Discusses deep learning models for accurate diagnosis of various diseases Includes new aspects in rheumatoid arthritis and diabetes research using advanced analytical tools Reviews application of feature fusion algorithms and feature reduction algorithms for accurate classification of images This book is aimed at researchers and graduate students in biomedical engineering medicine image processing and CAD *Mechatronics 2013* Tomáš Březina,Ryszard Jabłoński,2013-09-12 Mechatronics as the integrating framework of mechanical engineering electrical engineering computer technology control engineering and automation forms a crucial part in the design manufacture and maintenance of a wide range of engineering products and processes The mechatronics itself changes rapidly in last decade from original mixture of subfields into original approach in engineering as a technical discipline The book you are holding is aimed to help the reader to orient in this evolving field of science and technology Mechatronics 2013 Recent Technological and Scientific Advances is the fourth volume following the previous editions in 2007 2009 and 2011 providing the comprehensive and accessible coverage of advances in mechatronics presented on the 10th International Conference Mechatronics 2013 hosted this year at the Brno University of Technology Czech Republic The contributions that passed the thorough review process give an insight into current trends in research and development among Mechatronics 2013 contributing countries with paper topics covering design and modeling of mechatronic systems control and automation signal processing robotics and others keeping in mind the innovation benefits of mechatronics design approach leading to the development production and daily use of machines and devices possessing a certain degree of computer based intelligence Mechanics of Composite and Multi-functional Materials, Volume 7 W. Hardening ICHSU2015 which was held in Changsha China during October 15-18, 2015. To satisfy the increasingly urgent requirement of reducing the weight of vehicle structures and increasing passenger safety, ICHSU2015 provided an excellent international platform for researchers to share their knowledge and results in theory, methodology and applications of advanced high strength steel and press hardening technology. This conference aroused great interests and attentions from domestic and foreign researchers in hot stamping field. Experts in this field from Australia, China, Germany and Sweden contributed to the collection of research results and developments. The papers cover almost all the current topics of advanced high strength steel and press hardening technology.

Intelligent Decision Technologies Junzo Watada, Toyohide Watanabe, Gloria Phillips-Wren, Robert J. Howlett, Lakhmi C Jain, 2012-05-20. The Intelligent Decision Technologies (IDT) International Conference encourages an interchange of research on intelligent systems and intelligent technologies that enhance or improve decision making. The focus of IDT is interdisciplinary and includes research on all aspects of intelligent decision technologies from fundamental development to real applications. IDT has the potential to expand their support of decision making in such areas as finance, accounting, marketing, healthcare, medical and diagnostic systems, military decisions, production and operation networks, traffic management, crisis response, human-machine interfaces, financial and stock market monitoring and prediction, and robotics. Intelligent decision systems implement advances in intelligent agents, fuzzy logic, multi-agent systems, artificial neural networks and genetic algorithms among others. Emerging areas of active research include virtual decision environments, social networking, 3D human-machine interfaces, cognitive interfaces, collaborative systems, intelligent web mining, e-commerce, e-learning, e-business, bioinformatics, evolvable systems, virtual humans and designer drugs. This volume contains papers from the Fourth KES International Symposium on Intelligent Decision Technologies (KES IDT 12) hosted by researchers in Nagoya University and other institutions in Japan. This book contains chapters based on papers selected from a large number of submissions for consideration for the conference from the international community. The volume represents the current leading thought in intelligent decision technologies.

Laser-Based Additive Manufacturing of Metal Parts Linkan Bian, Nima Shamsaei, John Usher, 2017-08-09. Laser-Based Additive Manufacturing (LBAM) technologies hailed by some as the third industrial revolution can increase product performance while reducing time to market and manufacturing costs. This book is a comprehensive look at new technologies in LBAM of metal parts covering topics such as mechanical properties, microstructural features, thermal behavior and solidification process parameters optimization and control uncertainty quantification and more. The book is aimed at addressing the needs of a diverse cross section of engineers and professionals.
