From Reliable Sources An Introduction To Historical Methods:

From Reliable Sources Martha C. Howell, Walter Prevenier, 2001 A lively introduction to historical methodology an overview of the techniques historians must master in order to reconstruct the past [Handbook of Historical Methods for Management](#) Stephanie Decker, William M. Foster, Elena Giovannoni, 2023-07-01 The Handbook of Historical Methods for Management offers an invaluable compendium for researchers seeking to expand their methodological toolkit It showcases a variety of interdisciplinary approaches to the study of management provides both practical guidance and conceptual insights and offers a wide ranging picture of historical techniques for management [The Holocaust and Historical Methodology](#) Dan Stone, 2012 This book is timely and necessary and often extremely challenging It brings together an impressive cast of scholars spanning several academic generations Anyone interested in writing about the Holocaust should read this book and consider the implications of what is written here for their own work There seems to me little doubt that Holocaust history writing stands at something of a cross roads and the ways forward that this volume points to are extremely thought provoking Tom Lawson University of Winchester **Interdisciplinary Research** Allen F. Repko, Rick Szostak, 2020-01-21 Interdisciplinary Research Process and Theory offers a comprehensive systematic presentation of the interdisciplinary decision making process by drawing on student and professional work from the natural sciences social sciences humanities and applied fields Designed for active learning and problem based approaches the Fourth Edition includes expanded discussion of epistemology creativity within the interdisciplinary research process confirmation bias and social media the philosophy of integration and student work patterns mapping and the importance of performing independent research while working through this book An Instructor website for the book includes a test bank PowerPoint slides and tables and figures from the book **Educational Research** Burke Johnson, Larry Christensen, 2008 Educational Research is a highly readable text that provides students with a clear and in depth understanding of the different kinds of research including technology based that are used in education today The text introduces students to the fundamental logic of empirical research and explores the sources of research ideas Detailed descriptions guide students through the design and implementation of actual research studies with a balanced examination of quantitative qualitative and mixed research serving as one of the book s strongest features While quantitative research strategies are covered extensively the text also discusses various qualitative approaches such as ethnography historical methods phenomenology grounded theory and case studies The authors present detailed step by step coverage of the key elements of research including sampling techniques ethical considerations data collection methods measurement judging validity experimental and non experimental methods descriptive and inferential statistics qualitative data analysis and report preparation **Alternative Historiographies of the Digital Humanities** Dorothy Kim, Adeline Koh, 2021 Alternative Historiographies of the Digital Humanities examines the process of history in the narrative of the digital humanities and deconstructs its history as a straight line from the beginnings of humanities

Methods in the Philosophy of Science Sophie J Veigl, Adrian

Currie,2025-07-15 A guidebook to methods and methodology encouraging deeper engagement across the philosophy of science and beyond The last twenty years have seen multiple methodological revolutions in the philosophy of science There has been increased diversity concerning the questions asked who asks those questions who the relevant audiences are and what the techniques and tools involved are In *Methods in the Philosophy of Science A User's Guide* Sophie Veigl and Adrian Currie introduce this range of methods through both practical advice and philosophical reflection Each chapter introduces the reader to a method or set of methods in the philosophy of science discusses its advantages and limitations and provides practical guidance on how to learn skills relevant to applying the method The volume fulfills several critical roles First by introducing and discussing methods in the philosophy of science the collection increases philosophers awareness of methodological options of particular importance for younger scholars who are often not exposed to the diversity of practice Second the collection's practical focus will aid established philosophers in diversifying their own methodological toolkits Third collecting this diversity serves as a ground for philosophical reflection on what we as philosophers take ourselves to be capable of Fourth the collection hopes to increase interdisciplinary links between philosophy and other fields by laying clear the methodological continuity and complement between them

Dating Acts in its Jewish and Greco-Roman Contexts

Karl Leslie Armstrong,2021-01-14 There has been consistent apathy in recent years with regard to the long standing debate surrounding the date of Acts While the so called majority of scholars over the past century have been lulled into thinking that Acts was written between 70 and 90 CE the vast majority of recent scholarship is unanimously adamant that this middle range date is a convenient political compromise Karl Armstrong argues that a large part of the problem relates to a remarkable neglect of historical textual and source critical matters Compounding the problem further are the methodological flaws among the approaches to the middle and late date of Acts Armstrong thus demonstrates that a historiographical approach to the debate offers a strong framework for evaluating primary and secondary sources relating to the book of Acts By using a historiographical approach along with the support of modern principles of textual criticism and linguistics the historical context of Acts is determined to be concurrent with a date of 62-63 CE

The Oxford Handbook of Identities in Organizations Andrew D. Brown,2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate

identities as intentional relational and consequential. Seemingly intractable debates centred on the nature of identities, their relative stability or fluidity, whether they are best regarded as coherent or fractured, positive or not, and how they are fabricated within relations of power, combined with other conceptual issues, continue to invigorate the field. However, these debates have also led to some scepticism regarding the future potential of identities research. Yet, as the chapters in this Handbook demonstrate, there are considerable grounds for optimism that identity as root metaphor, nexus concept and means to bridge levels of analysis, has significant potential to generate multiple compelling streams of theorizing in organization and management studies.

Dance on Its Own Terms Melanie Bales, Karen Eliot, 2013-06-13 *Dance on its Own Terms: Histories and Methodologies* anthologizes a wide range of subjects examined from dance-centered methodologies, modes of research that are emergent, based in relevant systems of movement analysis, use primary sources and rely on critical informed observation of movement. The anthology fills a gap in current scholarship by emphasizing dance history and core disciplinary knowledge rather than theories imported from disciplines outside dance. Individual chapters serve as case studies that are further organized into three categories of significant dance activity: performance and reconstruction, pedagogy and choreographic process, and notational and other written forms that analyze and document dance. The breadth of the content reflects the richness and vibrancy of the dance field; each deeply informed examination serves as a window opening onto the larger world of dance. Conceptually, each chapter also raises concerns and questions that point to broadly inclusive methodological applications. Engaging and insightful, *Dance on its Own Terms* represents a major contribution to research on dance.

Radical Philosophy of Life Ernst Baasland, 2021-01-13 The Sermon on the Mount never ceases to challenge readers in every generation. New methods and new insights into new surroundings have to be applied to the most influential speech ever given. In this study, Ernst Baasland takes a fresh look at the history of research done on it, both on its broad influence and on the variety of interpretations. The historical questions are seen from new perspectives. Is orality the key to a better understanding? To what extent can we reconstruct a pre-text and the question of authenticity be answered? These questions are seen through historiographical lenses. The author argues in favour of a universal addressee and maintains that the speech contains radical philosophical thinking. The first audience consisted of Jews and the religiously based understanding of life is conceived within Judaism. However, its ethics of wisdom is developed in a Hellenistic setting and provides a radical philosophy of life.

Completing a Professional Practice Dissertation Jerry W. Willis, Ron Valenti, Deborah Inman, 2010-06-01 A growing number of both established and newly developed doctoral programs are focusing on the preparation of practitioners rather than career researchers. Professional doctorates such as the Doctor of Nursing Practice (DNP), Doctor of Education (EdD), Doctor of Pharmacy (PharmD), Doctor of Professional Studies (DProf or DPS), and the Doctor of Psychology (PsyD) are in fact just a few of the professional doctorates being offered today. Professional doctorates are the fastest growing segment of doctoral education. The nature of the dissertation and the process of

completing a dissertation can be quite different in a professional practice doctoral program but there are few resources for both students and faculty involved in completing and mentoring such dissertations This book was written specifically for students and faculty involved in professional practice dissertation work It addresses both the tasks and procedures that professional practice dissertations have in common with dissertations in research doctoral programs as well as the tasks and issues that are more common in professional practice doctoral programs For example negotiating entry into applied settings and securing the cooperation of practicing professionals is covered as are alternative models for the dissertation e g the three article dissertation or TAD The book also covers tasks such as getting IRB approval for applied dissertation research conducted in the field and how to propose and carry out studies based on applied and professional models of research This book written by three experienced mentors of professional practice dissertation students is the comprehensive guide for both students and faculty

From History to Theory Kerwin Lee Klein, 2011-05-19 From History to Theory describes major changes in the conceptual language of the humanities particularly in the discourse of history In seven beautifully written closely related essays Kerwin Lee Klein traces the development of academic vocabularies through the dynamically shifting cultural political and linguistic landscapes of the twentieth century He considers the rise and fall of philosophy of history and discusses past attempts to imbue historical discourse with scientific precision He explores the development of the meta narrative and the post Marxist view of history and shows how the present resurgence of old words such as memory in new contexts is providing a way to address marginalized peoples In analyzing linguistic changes in the North American academy From History to Theory innovatively ties semantic shifts in academic discourse to key trends in American society culture and politics

Research within the Disciplines Peggy Keeran, Michael Levine-Clark, 2014-04-28 Research within the Disciplines is designed to help reference librarians and students studying to become librarians gain that deeper understanding of disciplinary differences that allows them to comfortably solve information needs rather than merely responding to questions and practical knowledge about how to work with researchers in a library setting The book has three chapters that cover the disciplines at the broadest level humanities social sciences and sciences plus supplemental chapters that focus on associated disciplines research in history business and engineering research using government sources and across disciplines interdisciplinary and critical information literacy For the second edition of Research within the Disciplines several chapters have been added that together give a broader and deeper overview of research across all subject areas research practices of creative and performing artists and of clinical scientists research in international documents research strategies for foreign language materials and visual literacy across the disciplines Major shifts in technology have been accounted for that have changed how we do research and have expanded the range of resources available to researchers in all disciplines All of the chapters have been rewritten or heavily revised this is much more a new book than a new edition

Art as a Pathway to God Susangeline Yalili Patrick, 2024-04-22 This book integrates history theology and art and analyzes

the Jesuits cross cultural mission in late imperial China Readers will find a rich collection of resources from historical sites museums manuscripts and archival materials including previous unpublished works of art The production and circulation of art from different historical periods and categories show the artistic theological and missional values of Christian art It highlights European Jesuits Asian Christians transnationalism and gives voice to Chinese Christian women and their patronage of art in the seventeenth century It offers a rare systematic study of the relation between art and mission history

Inventing Christic Jesuses, Volume 1 Charles A. Wilson, 2017-11-09 Inventing Christic Jesuses is the first comprehensive proposal for how revisionist theology can deploy historical Jesus research in a methodologically sophisticated way Rejecting positions that insulate theology from Jesus research the proposal sets out warrants and rules for a quested Christology in dialogue with an analysis of the conduct of historians of Jesus from the period of the Third Quest c 1980 2010 The volume Method analyzes for theology the methods and values of historical research on Jesus It argues that the methodic construction of historical images of Jesus in conversation with sources is simultaneously a retrojective activity of value production First in defining the terms of the inquiry Wilson locates a middle ground between hostility to questing and a too ready application of historical results to Christology He then identifies rules and warrants for the deployment of Jesus research in theology and reconstructs the notion of the retrojection of value in the production of a historical Jesus The volume ends with a case study of retrojective Jesus production an analysis and assessment of the new notion that Jesus is a sage in the tradition of wisdom

The Oxford Handbook of Multimethod and Mixed Methods Research Inquiry Sharlene Nagy Hesse-Biber, R. Burke Johnson, 2015-06-04 Offering a variety of innovative methods and tools The Oxford Handbook of Multimethod and Mixed Methods Research Inquiry provides the most comprehensive and up to date presentation on multi and mixed methods research available Written in clear and concise language by leading scholars in the field it enhances and disrupts traditional ways of asking and addressing complex research questions Topics include an overview of theory paradigms and scientific inquiry a guide to conducting a multi and mixed methods research study from start to finish current uses of multi and mixed methods research across academic disciplines and research fields the latest technologies and how they can be incorporated into study design and a presentation of multiple perspectives on the key remaining debates Each chapter in the volume is structured to include state of the art research examples that cross a range of disciplines and interdisciplinary research settings In addition the Handbook offers multiple quantitative and qualitative theoretical and interdisciplinary visions and praxis Researchers faculty graduate students and policy makers will appreciate the exceptional timely and critical coverage in this Handbook which deftly addresses the interdisciplinary and complex questions that a diverse set of research communities are facing today

Authenticating Criteria in Jesus Research and Beyond Kevin B. Burr, 2023-10-16 Are the criteria of authenticity of Jesus research idiosyncratic to New Testament studies vehicles of subjectivity and fundamentally flawed vestiges of form criticism as some claim today If so why do opponents of the

criteria approach still use them Or are the criteria the tools of general historiography as others assert If true none have adequately demonstrated where and how principles such as multiple attestation general and historical coherence dissimilarity and embarrassment feature in general historiographic method until now This study analyzes the methods of general historians and Jesus researchers who favor or oppose the criteria and demonstrates that regardless of sub discipline authenticating criteria are inherent to the practice of historiography
