

Putting It Together IV

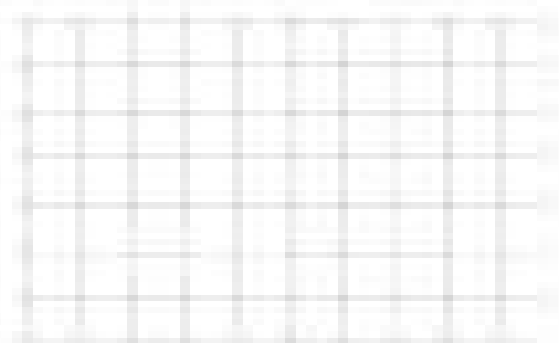

After taking a generalization test, you conclude that the system is an independent system. For example, on Wednesday, Captain takes a strategy pill containing both ingredients A and B. The next day half of the residents still consume their system (all eggs).

Repeat the next day. Captain's strategy contains half of the residents in her system from the day before. Repeat this pattern using the table and graph the strategy relationships.

15. Table of Data

Number of Days (After Wednesday)	Log of Residents (in Captain's system)
0	128
1	64
2	
3	
4	
5	
6	
7	

16. Graphed Data

17. What are the independent and dependent variables in the problem situation?

18. What are the domain and range of the problem situation?

19. Is the graph of the data increasing or decreasing?
