*Annual Reports [of] President and Treasurer* Wellesley College, 1918      *Medical Thinking* Steven Schwartz, Timothy Griffin, 2012-12-06 Decision making is the physician's major activity Every day in doctors' offices throughout the world patients describe their symptoms and complaints while doctors perform examinations order tests and on the basis of these data decide what is wrong and what should be done Although the process may appear routine even to the physicians involved each step in the sequence requires skilled clinical judgment Physicians must decide which symptoms are important whether any laboratory tests should be done how the various items of clinical data should be combined and finally which of several treatments including doing nothing is indicated Although much of the information used in clinical decision making is objective the physician's values a belief that pain relief is more important than potential addiction to pain killing drugs for example and subjectivity are as much a part of the clinical process as the objective findings of laboratory tests In recent years both physicians and psychologists have come to realize that patient management decisions are not only subjective but also probabilistic although this is not always acknowledged overtly When doctors argue that an operation is fairly safe because it has a mortality rate of only 1 % they are at least implicitly admitting that the outcome of their decision is based on probability      **The Breeder's Gazette** , 1918      **Billboard** , 1957-11-25 In its 114th year Billboard remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends      **The Magazine of Wall Street and Business Analyst** , 1919      **Gathering to Save a Nation** Stephen D.
