

sweeping the entire Europe. It took the remedies of errors made by the armies to protect America. The nation had to get involved in the French war.

Marshall asserts that he had to stand out and persuade the reigning authority on the need to establish an everlasting defense policy in the nation. He perceived this as to save the nation of its myriad wealth which was going waste. With Hitler forging several wars with the American nation, the Great Britain had to stand in between them. But one nation has since pushed America to settle for an internal peace and protection. Considering that it is one of the stronger nations, it is concerned with assigning peace to the entire nations of the world. In this case, we see America standing out as one of the forces of peace during the Truman times. Therefore, according to the author, a nation as the US has all the capacity to prepare for and against war.

Technology and war

As evidenced during the Truman times, international war is mostly won with skillful utilization of military machines. This is reflective with the American soldiers during this time. According to the author, men are needed in war same to technology. For instance, the American success in air and sea fights centrally dwelt on technology. Apart from relying on me alone, the author emphasizes that technology is quite subtle to any success in the modern warfare. Moreover, technology is quite contributory to the entire success of national economy. Men are needed as much as technology is important.

The farewell address of 1961

This was a farewell that warned the US on the impending military industrial complex. President Eisenhower takes time to assert on the possible threats the nation was facing as a result of successes seen in the 50s. America as a nation had gone through rigorous period of warfare. According to Eisenhower, many Americans had not understood the real threats posed by the nation's unpreparedness for any war of modern age. However, he thanks the American individuals for standing strong during the past time. He singles out the spirit and power of statesmanship that could transform the nation into a scientific technological elite. With this, the author perceives tranquility, free governance, integrity and dignity among the American citizens. He urged the nation to always be on a verge of striving for high and more that would sustain the nation's future needs (Pogue 213).

As in the case of the previous author, Eisenhower urges military strength and establishment as critical to the nation's survival in the case of dubious attacks. He orchestrated all efforts to future developments that could save the nation's future plans and generations as far as peace is concerned. Furthermore, he echoes that the present state of peace and worthiness cannot be guaranteed tomorrow not unless vivid plans are laid out to cater for the future generations. In his remarks, he declares the importance of achieving the need of avoiding war.
