Bonazzo, Nina Wu, 2015 The early childhood field has long understood that targeting the intersection of health and learning is integral to serving children especially those from disadvantaged backgrounds Yet this developmentally informed educational philosophy has been jeopardized by an increased emphasis on standards based accountability In this book the authors explain why healthy learning is good for children schools and society and they suggest concrete ways to make it happen Moving back and forth between national statistics and the intimate voices of parents teachers and service providers in a large urban school district they formulate an action plan for educating the whole child and reducing educational inequities While the book covers a broad spectrum of American children special attention is given to the growing population of Mexican immigrant children Chapters include Issues to Ponder Keywords Take Home Messages and Next Questions Book Features An in depth examination of the connection between good health and learning that all too often is lost in the daily hustle and bustle of families and schools Statistical evidence from the national level combined with the voices of participants on the local level providing a scientifically rigorous and personalized portrait of early childhood education in the United States A focus on diversity and inequality highlighting the experiences of children from underserved and often marginalized groups Blending diverse data sources and analytic tools Crosnoe Bonazzo and Wu present a compelling case for linking ECE with health in policy and practice The authors paint a cogent picture of early learning in social contexts with a focus on the paradoxical trajectories of the children of Mexican immigrants Pedagogically rich in terms of policy and methodologically innovative this book shows the power of multimethod research Beth Graue Sorenson Professor of Childhood Studies Department of Curriculum and Instruction University of Wisconsin Madison This book is important for anyone who is concerned about educational equity high quality early education educational policy issues or improving educational and occupational outcomes for vulnerable populations One aspect of early education that is frequently overlooked is health care and its central role in early learning is highlighted in this book Although *Healthy Learners* focuses on the Mexican immigrant population the analysis findings and recommendations are highly relevant for all children and families that face adversities The writing is clear multiple forms of data are provided to support arguments and the voices or personal reflections of children parents and providers vividly illustrate the main points of each chapter I highly recommend this book to all levels of the early care and education profession Linda Espinosa University of Missouri Columbia **Pencils Down** Wayne Au, Melissa Bollow Tempel, 2012 This powerful collection from the groundbreaking *Rethinking Schools* magazine takes high stakes standardized tests to task Despite overwhelming evidence that the tests are invalid ways to measure teaching and learning and continuing signs of their unjust effects on students and teachers reformers and policymakers continue to force high stakes tests into the public schools Through articles that provide thoughtful and emotional critiques from the frontlines

of education Pencils Down deconstructs the damage that standardized tests wreak on our education system and the human beings that populate it Better yet it offers visionary forms of assessment that are not only more authentic but also more democratic fair and accurate
