Bulletin showing Titles of Books added to the Boston Public Library with Bibliographical Notes, etc. Boston Public Library, 2021-10-28 Reprint of the original first published in 1890 *Thirty Years of Psychical Research* Charles Richet, 1923

After death Léon Denis, 2023-11-14 What happens after death Is it the end of the road or the start of a different expression of life L on Denis answers these questions and many more using plain and clear language This book is an exposition on the Doctrine of the Spirits a scientific and rational solution to the problems of life and death It addresses the nature of the human being and sheds light on subjects such as the afterlife spirits heaven and hell the invisible worlds and all facets of the human soul It discusses the will judgment the superior life the cycles of reincarnation immortality God and much more It is meant for those who are tired of living blind who may not really know who they are or why they are here those who are no longer satisfied with today's materialistic civilization those who aspire to a higher order of things **Here and**

Hereafter Léon Denis, 1909 **Investigating the Supernatural** Sofie Lachapelle, 2011-06-01 A convincing account of science's flirtation with the marginal and the marvelous from the author of *Conjuring Science* *Journal of the History of the Behavioral Sciences* Sciences were wildly popular in France between 1850 and 1930 when members of the general public and scholars alike turned to the wondrous as a means of understanding and explaining the world Sofie Lachapelle explores how five distinct groups attempted to use and legitimize sciences spiritists who tried to create a new science concerned with the spiritual realm and the afterlife occultists who hoped to connect ancient revelations with contemporary science physicians psychiatrists and psychologists who developed a pathology of supernatural experiences psychical researchers who drew on the unexplained experiences of the public to create a new field of research and metapsychists who attempted to develop a new science of yet to be understood natural forces An enlightening and entertaining narrative that includes colorful people like Allan Kardec a pseudonymous former mathematics teacher from Lyon who wrote successful works on the science of the sciences and what happened after death *Investigating the Supernatural* reveals the rich and vibrant diversity of unorthodox beliefs and practices that existed at the borders of the French scientific culture in the late nineteenth and early twentieth centuries What is science In her engaging book Sophie Lachapelle probes for an answer by looking at the liminal realm between science and superstition and the attempt to render the supernatural explicable in naturalistic terms Isis A welcome addition to the growing literature on spiritism occultism and physical research in modern France *French History* **Journal**

of the Society for Psychical Research Society for Psychical Research (Great Britain), 1927 **The Spiritist Fallacy** René Guénon, 2003 *The Spiritual Fallacy* though packed with arcane facts is unique in revealing how one of the greatest metaphysicians of our age interprets the phenomena real or alleged of spiritualism The doctrinal expositions that accompany his astonishing account offer extraordinarily prescient insight into many deviations and psychological afflictions of the modern mind and will be a valuable to psychological practitioners and spiritual counselors as to historians of esoteric history

It also offers a profound corrective to the many brands of New Age therapy that all too unwittingly invoke many of the same elements whose nefarious origins Guenon so clearly described many years ago **The National Union Catalog, Pre-1956 Imprints** Library of Congress, American Library Association. Committee on Resources of American Libraries. National Union Catalog Subcommittee, 1972 *The Theosophist* , 1887 The Spirit World Unmasked Henry Ridgely Evans, 1897

Laboratories of Faith John Warne Monroe, 2018-07-05 At a fascinating moment in French intellectual history an interest in matters occult was not equivalent to a rejection of scientific thought participants in séances and magic rituals were seekers after experimental data as well as spiritual truth A young astronomy student wrote of his quest I am not in the presence or under the influence of any evil spirit I study Spiritism as I study mathematics He did not see himself as an ecstatic visionary but rather as a sober observer For him the darkened room of occult practice was as much laboratory as church In an evocative history of alternative religious practices in France in the second half of the nineteenth and beginning of the twentieth centuries John Warne Monroe tells the interconnected stories of three movements Mesmerism Spiritism and Occultism Adherents of these groups Monroe reveals attempted to modernize faith by providing empirical support for metaphysical concepts Instead of trusting theological speculation about the nature of the soul these believers attempted to gather tangible evidence through Mesmeric experiments séances and ceremonial magic While few French people were active Mesmerists Spiritists or Occultists large segments of the educated general public were familiar with these movements and often regarded them as fascinating expressions of the modern condition a notable contrast to the Catholicism and secular materialism that prevailed in their culture Featuring eerie spirit photographs amusing Daumier lithographs and a posthumous autograph from Voltaire as well as extensive documentary evidence *Laboratories of Faith* gives readers a sense of what being in a séance or a secret society ritual might actually have felt like and why these feelings attracted participants While they never achieved the transformation of human consciousness for which they strove these thinkers and believers nevertheless pioneered a way of being religious that has become an enduring part of the Western cultural vocabulary

Madame Blavatsky refutes the modern negators of Ancient Science Helena Petrovna Blavatsky, 2018-05-08 An offering to those who though may be enlightened on some special point of science take upon themselves the right of

pronouncing arbitrarily their judgment on all things and are ready to reject everything new which shocks their ideas often for the sole reason that if it were true they could not remain ignorant of it Hours with the Ghosts: Nineteenth Century Witchcraft Illustrated Investigations into the Phenomena of Spiritualism and Theosophy Henry Ridgely Evans, 2020-09-28 It is a strange fact that the more materialistic the age the deeper the interest in spiritual questions The vitality and persistence of the belief in the reality of the spiritual world is evidence of that hunger for the ideal for God of which the Psalmist speaks As the heart panteth after water brooks so panteth my soul after Thee O God Through the passing centuries we have come into a larger nobler conception of the Universal Life and our relations to that Life in which we live move and have our being Granting the existence of an Eternal and Infinite Spirit the Intellectual Organizer of the mathematical laws which the physical forces obey and conceiving ourselves as individualized points of life in the Greater Life we are constrained to believe that we bear within us the undying spark of divinity and immortality Evolution points to eternal life as the final goal of self conscious spirit else this mighty earth travail the long ages of struggle to produce man are utterly without meaning Speaking of a future life John Fiske a leading American exponent of the doctrine of evolution says The Destiny of Man The doctrine of evolution does not allow us to take the atheistic view of the position of man It is true that modern astronomy shows us giant balls of vapor condensing into fiery suns cooling down into planets fit for the support of life and at last growing cold and rigid in death like the moon And there are indications of a time when systems of dead planets shall fall in upon their central ember that was once a sun and the whole lifeless mass thus regaining heat shall expand into a nebulous cloud like that with which we started that the work of condensation and evolution may begin over again These Titanic events must doubtless seem to our limited vision like an endless and aimless series of cosmical changes From the first dawning of life we see all things working together toward one mighty goal the evolution of the most exalted spiritual qualities which characterize Humanity The body is cast aside and returns to the dust of which it was made The earth so marvelously wrought to man s uses will also be cast aside So small is the value which Nature sets upon the perishable forms of matter The question then is reduced to this Are man s highest spiritual qualities into the production of which all this creative energy has gone to disappear with the rest Are we to regard the Creator s work as like that of a child who builds houses out of blocks just for the pleasure of knocking them down For aught that science can tell us it may be so but I can see no good reason for believing any such thing
