Le Sacrifice Fondateur De Civilisation Et D'individuation:

Le Sacrifice fondateur de civilisation et d'individuation Pierre Solié, 2015-05-18 C'est sur le double thème de l'inceste et du sacrifice qu'eut lieu en son temps la grande rupture entre Freud et Jung. C'est dire tout aussi bien quelle en fait l'importance et combien il s'agissait de notions tout fait centrales pour le psychologue de Zurich. Pierre Solié aujourd'hui reprend cette notion de sacrifice, sa nature, ses modalités, sa fonction psychique et religieuse, en tentant de la mener jusqu'au bout, travers une vaste enquête qui va de la Grèce à l'Inde et d'Israël au Mexique, et qui intègre aussi bien l'histoire que l'ethnologie et les sciences religieuses pour lui faire rendre tout son sens. Alors s'aperçoit-on que l'exercice du sacrifice, renoncement soi-même dans ce qu'on a d'illusoire, mais aussi fabrication de sacré selon l'étymologie, de ce mot est nécessaire au déploiement de toute vie, dès qu'elle dépasse l'affirmation de l'individu au profit de l'émergence de la personne, de même que seul le sacrifice socialement réglé et fondé permet de quitter l'état de sauvagerie naturelle pour accéder à la civilisation.

Psychanalyste, didacticien, Pierre Solié a été président de la Société française de psychologie analytique, psychanalyse jungienne. Auteur de nombreux ouvrages, en particulier sur les rapports de la psychologie, la biologie et sur la psychosomatique, c'est lui qui le premier en France a théorisé le concept de Grande Mère, antérieur même à celui du Père, et a dégagé les structures psychiques mythiques et analytiques de ceux qu'il a appelés les Fils Amants par rapport aux Fils Oedipiens de l'analyse freudienne.

Understanding Religious Sacrifice Jeffrey Carter, 2003-03-01 This volume provides a thorough introduction to the major classic and modern writings dealing with religious sacrifice. Collected here are twenty-five influential selections, each with a brief introduction addressing the overall framework and assumptions of its author. As they present different theories and examples of sacrifice, these selections also discuss important concepts in religious studies, such as the origin of religion, totemism, magic, symbolism, violence, structuralism, and ritual performance. Students of comparative religion, ritual studies, the history of religions, the anthropology of religion, and theories of religion will particularly value the historical organization and thematic analyses presented in this collection.

The Relevance of René Thom Isabel Marcos, Clément Morier, 2024-08-29 The body of work presented in this book comes from research carried out since 2017 as part of the international Actualité de René Thom project. This project was initially entitled Morphology and qualitative dynamics. Knowledge of forms, Forms of knowledge. Subsequently, the name Relevance of René Thom was chosen for its clarity and evocative power. The aim of this research project is to promote the scientific relevance of René Thom's thinking on forms and to demonstrate the importance of his method and discoveries. It is based on discussions of Thom's thinking and the method he proposes, i.e. to seek out dynamic structures in order to understand changes of form in nature and at the human social level, to explain the transformation of these dynamic forms, to study the morphologies of process in various fields in order to advance scientific knowledge. The relevance of this thinker has manifested itself in the form of monthly sessions of a research seminar held from 2017 to 2022, as well as in the form of international congresses in 2018 and 2019, bringing together the greatest friends

and continuators both of the work of Ren Thom himself and of reflection on morphogenetic dynamics in the most diverse disciplines This created a space for dialogue and listening between the exact sciences and the social and human sciences Indeed the fields of study are necessarily interdisciplinary since as Ren Thom teaches us morphological organization or form in its exchanges with matter must be considered as independent of its substrate i e the environment in which this morphogenesis unfolds Finally this book marks a symbolic moment it takes shape in the year that marks the centenary of the birth of Ren Thom who was born in the French town of Montbliard in 1923 To mark this centenary 1923 2023 a number of initiatives have been launched to celebrate the discoveries and advances of this mathematician philosopher as he liked to call himself The publication of the present book is one more which we hope will shed light that will stimulate the morphological gaze Thom so urged us to adopt
