**Awareness shaping or shaped by prediction and postdiction** Yuki Yamada, Takahiro Kawabe, 2015-06-08 We intuitively believe that we are aware of the external world as it is Unfortunately this is not entirely true In fact the capacity of our sensory system is too small to veridically perceive the world To overcome this problem the sensory system has to spatiotemporally integrate neural signals in order to interpret the external world However the spatiotemporal integration involves severe neural latencies How does the sensory system keep up with the ever changing external world As later discussed prediction and postdiction are essential keywords here For example the sensory system uses temporally preceding events to predict subsequent events e.g. Nijhawan 1994 Kerzel 2003 Hubbard 2005 even when the preceding event is subliminally presented Schmidt 2000 Moreover internal prediction modulates the perception of action outcomes Bays et al 2005 Cardoso Leite et al 2010 and sense of agency Wenke et al 2010 Prediction is also an indispensable factor for movement planning and control Kawato 1999 On the other hand the sensory system also makes use of subsequent events to postdictively interpret a preceding event e.g. Eagleman Enns 2002 Khuu et al 2010 Kawabe 2011 2012 Miyazaki et al 2010 Ono Lau et al 2007 How prediction and postdiction shape awareness of the external world is an intriguing question Prediction is involved with the encoding of incoming signals whereas postdiction is related to a re-interpretation of already encoded signals Given this perspective prediction and postdiction may exist along a processing stream for a single external event However it is unclear whether and if so how prediction and postdiction interact with each other to shape awareness of the external world Awareness of the external world may also shape prediction and or postdiction It is plausible that awareness of the external world drives the prediction and postdiction of future and past appearances of the world However the literature provides little information about the role of awareness of the external world in prediction and postdiction This background propelled us to propose this research topic with the aim of offering a space for systematic discussion concerning the relationship between awareness prediction and postdiction among researchers in broad research areas such as psychology psychophysics neuroscience cognitive science philosophy and so forth We encouraged papers that address one or more of the following questions 1 How does prediction shape awareness of the external world 2 How does postdiction shape

awareness of the external world 3 How do prediction and postdiction interact with each other in shaping awareness of the external world 4 How does awareness of the external world shape prediction postdiction     The Train Dispatcher ,1927
