The Elite Traveller and Conde Nast Traveller are two magazines that review and rank the best restaurants in Paris. Based on different sets of criteria, scores out of 10 are assigned to 8 restaurants in Paris (labelled A to H). The raw data is collated in the following table.

Restaurants	A	B	C	D	E	F	G	H
Elite Traveller's score ( $x$ )	8.1	6.7	6.9	7.5	9.7	8.8	5.6	7.2
Conde Nast Traveller's score ( $y$ )	8.8	6.8	6.9	7.2	9.3	6.2	6.4	7.7
Elite Traveller's rank								
Conde Nast Traveller's rank								

(a) (i) Find the Pearson's product-moment correlation coefficient,  $r$ , for this data.

(ii) Using the value of  $r$ , interpret the relationship between the Elite Traveller's score and the Conde Nast Traveller's score. [4]

(b) Find the equation of the line of regression,  $y$  on  $x$ . [2]

(c) (i) Use your regression equation from part (b) to estimate the Conde Nast Traveller's score when the Elite Traveller awarded a perfect 10.

(ii) State whether this estimate is reliable. Justify your answer. [4]

(d) Complete the two empty rank rows in the table above. [2]

(e) (i) Find the value of the Spearman's rank correlation coefficient,  $r_s$ .

(ii) Comment on the result obtained for  $r_s$ . [4]

The Director of the Elite Traveller Magazine believes that the score for restaurant E was too high and decreased the score from 9.7 to 9.2.

(f) Explain why the value of the Spearman's rank correlation coefficient  $r_s$  does not change. [1]

### Mark Scheme

(a) (i)  $r = 0.961$  [by using G.D.C.]

(ii) Since the correlation coefficient is positive and close to 1, there is a very strong positive correlation between the Elite Traveller's score and Conde Nast Traveller's score.

(b)  $y = 0.685x + 2.38$  [by using G.D.C.]

(c) (i) Substituting  $x = 10$  into the equation of the regression line, we get

$$y = 0.685(10) + 2.38$$

$$= 9.23$$

(ii) This estimate is not reliable as  $x = 10$  falls out of the data range [5.6, 9.7].

(d) Rearranging the scores of these restaurants in descending order, we obtain their ranks for each magazine in the following table.

Restaurants	A	B	C	D	E	F	G	H
Elite Traveller's rank	3	7	6	4	1	2	8	5
Conde Nast Traveller's rank	1	6.5	6.5	3	1	2	8	4

**One Hundred Years of Pressure** Alan F. Chalmers, 2017-04-20 This monograph investigates the development of hydrostatics as a science In the process it sheds new light on the nature of science and its origins in the Scientific Revolution Readers will come to see that the history of hydrostatics reveals subtle ways in which the science of the seventeenth century differed from previous periods The key the author argues is the new insights into the concept of pressure that emerged during the Scientific Revolution This came about due to contributions from such figures as Simon Stevin Pascal Boyle and Newton The author compares their work with Galileo and Descartes neither of whom grasped the need for a new conception of pressure As a result their contributions to hydrostatics were unproductive The story ends with

Newton insofar as his version of hydrostatics set the subject on its modern course He articulated a technical notion of pressure that was up to the task Newton compared the mathematical way in hydrostatics and the experimental way and sided with the former The subtleties that lie behind Newton s position throws light on the way in which developments in seventeenth century science simultaneously involved mathematization and experimentation This book serves as an example of the degree of conceptual change that new sciences often require It will be of interest to those involved in the study of history and philosophy of science It will also appeal to physicists as well as interested general readers      **Uncertainty in**

Olivia Levrini, Giulia Tasquier, Tamer G. Amin, Laura Branchetti, Mariana Levin, 2021-09-24 This book starts with the premise that beauty can be an engine of transformation and authentic engagement in an increasingly complex world It presents an organized picture of highlights from the 13th European Science Education Research Association Conference ESERA 2019 held in Bologna Italy The collection includes contributions that discuss contemporary issues such as climate change multiculturalism and the flourishing of new interdisciplinary areas of investigation including the application of cognitive neuroscience artificial intelligence and digital humanities to science education research It also highlights learners difficulties engaging with socio scientific issues in a digital and post truth era The volume demonstrates that deepening our understanding is the preferred way to address these challenges and that science education has a key role to play in this effort In particular the book advances the argument that the deep and novel character of these challenges requires a collective search for new narratives and languages an expanding knowledge base and new theoretical perspectives and methods of research The book provides a contemporary picture of science education research and looks to the theoretical and practical societal challenges of the future      **A Theory of Forced Labour Migration** Ali Kadri, 2020-06-02 This book focuses on

labour dislocation and migration of Palestinians between 1967 and 1992 In particular it highlights the social transformations

in the occupied Palestinian territory where Palestinian labour was permitted to work in Israel from 1968 onwards. Elaborating on the results of the policy which saw a gradual increase in the number of Palestinian workers commuting daily from a negligible proportion of the actively participating labour force to 35 percent of all employed persons and 60 percent of all wage paid workers the book studies this unique case which embodies characteristics from permanent migration situations not only in the de jure but also the de facto sense insofar as it embeds higher risks and reallocates resources as if it was a permanent relocation scenario. Illustrated with tables and econometric results the book identifies the determinants and implications of migrant labour from the West Bank using two broad methodologies the neoclassical and the historical structural method. Each of these methods is divided into two branches the classical divided into price determined and a choice theoretic framework and the historical structural divided into dependency and Marxist theory. In order to gain a comprehensive understanding of the situation all four perspectives are employed in the investigation. In doing so what emerges is a structure for the book which takes shape along the different lines of migration literature. The book provides new insights into the making of wage labour and labour migration theory. **Statutes and Ordinances of the University of Cambridge 2008**

University of Cambridge, 2008-09-25 This is the latest updated edition of the University of Cambridge's official statutes and Ordinances. Handbook on Planning and Climate Change Adaptation Patrick Brandful

Cobbinah, Michael Addaney, 2025-08-11 This timely Handbook explores how planning can be used as a mechanism a tool and a process to sustainably manage the impacts of climate change. Conceptually grounded in the planning and climate change literature it illustrates the different capabilities and inadequacies of planning in addressing climate change adaptation.

Making Classrooms Better: 50 Practical Applications of Mind, Brain, and Education Science Tracey Tokuhama-Espinosa, 2014-04-28 This book goes beyond neuroscience explanations of learning to demonstrate exactly what works in the classroom and why. Lessons from mind brain and education science are put into practice using students as a lab to test these theories. Strategies and approaches for doing so and a general list of best practices will guide and serve teachers administrators and parents.

Provided by publisher Long-Term Governance for Social-Ecological Change Bernd Siebenhüner, Marlen Arnold, Klaus Eisenack, Klaus H. Jacob, 2013-08-21 The book discusses how to tackle long term social and ecological problems by using

different environmental governance approaches to creating sustainable development. It explores opportunities and requirements for the governance of long term problems and examines how to achieve a lasting transformation. When investments are made to mitigate climate change or preserve biodiversity, future generations can reap benefits from the efforts of the present generation. However, long term social ecological change towards sustainable development is disrupted by the fact that the costs and benefits of action are seen by different generations. With a global focus that includes case studies from Europe, Asia, Africa, and North America, this book attempts to address the difficulty of developing and implementing effective long term governance solutions. The authors examine what distinguishes long term problems from other policy problems, what governance responses are available and used, and how different governance mechanisms, namely economic incentives, participation, as well as knowledge and learning, help to address them. Combining the perspectives on the different governance approaches and featuring case studies on national, regional, and global issues, *Long Term Governance for Social Ecological Change* will be of interest to policy makers, students, and scholars of global environmental governance, development, sustainability, politics, economics, law, and sociology.
