Incidental catch of vulnerable species in Mediterranean and Black Sea fisheries - A review Carpentieri, P., Nastasi, A., Sessa, M., Srouf, A. (eds.),2021-06-28 Bycatch a term widely used to refer to part of the catch unintentionally caught during a fishing operation in addition to target species and consisting of the discards and incidental catch of vulnerable species is considered one of the most important threats to the profitability and sustainability of fisheries as well as to the conservation of the marine environment and ecosystems Understanding the bycatch issue and adopting effective measures in order to reduce bycatch rates are essential steps towards minimizing the impacts on vulnerable species and ensuring both a sustainable fisheries sector and healthy seas In the Mediterranean and the Black Sea the incidental catch of vulnerable species namely seabirds sea turtles elasmobranchs marine mammals and macrobenthic invertebrates represents one of several challenges for the industrial semi industrial and small scale fisheries that coexist in the region as well as for the diverse and sensitive ecosystems impacted Typically data on this issue have been collected in an opportunistic manner and in ways that make comparisons difficult The annual absolute values of incidental catch of vulnerable species are not available studies cover only a small portion of the total fishing activity and often present important knowledge gaps for many types of fishing gear countries and or subregions as well as on

temporal scales for example to establish reliable baselines The result is that little is known of the scope of the problem despite incidental catch being a significant pressure on the populations of vulnerable species as well as a concern for fishers This regional review is an attempt to compile in one single document all available data and historical records on the incidental catch of vulnerable species in the Mediterranean and Black Sea fisheries obtained from existing literature databases and other grey sources and collated in a standardized and comparable way The main objective is to provide comprehensive baseline information earmark the main data gaps as well as identify the most impacting types of fishing gear by taxonomic group This work is a reminder of the importance of standardized data collection and the need to have baseline information in order to support decision making in the identification of appropriate bycatch mitigation techniques thus enabling analysis of their effectiveness and comparison over time and space as well as facilitating the implementation of relevant conservation and or management measures at the national subregional and regional levels **Poetry as**

Resistance Nukhbah Taj Langah,2020-11-29 Focusing on the culturally and historically rich Siraiki speaking region often tagged as South Punjab this book discusses the ways in which Siraiki creative writers have transformed into political activists resisting the self imposed domination of the Punjabi Mohajir ruling elite Influenced by Sufi poets their poetry takes the shape of both protest and dialogue This book reflects upon the politics of identity and the political complications which are a result of colonisation and later neo colonisation of Pakistan It challenges the philosophy of Pakistan a state created for Muslims which is now taking the shape of religious fanaticism while disregarding ethnic and linguistic issues such as that of Siraiki

Inclusion Matters World Bank,2013-11-26 Social inclusion is on the agenda of governments policymakers and nonstate actors around the world Underpinning this concern is the realization that despite progress on poverty reduction some people continue to feel left out This report aims to unpack the concept of social inclusion and understand better how policies can be designed to further inclusion First the report offers a definition of social inclusion as the process of improving the terms for individuals and groups to take part in society It unpacks different domains of society that excluded groups and individuals are at particular risk of being left out of markets services and spaces Second the report discusses the most important global mega trends such as migration climate change and aging of societies which will impact challenges and opportunities for inclusion Finally it argues that despite these challenges change towards inclusion is possible and offers examples of inclusionary policies **Religious Interactions in Europe and the Mediterranean World** Katsumi Fukasawa,Benjamin J.

Kaplan,Pierre-Yves Beaurepaire,2017-07-14 The religious histories of Christian and Muslim countries in Europe and Western Asia are often treated in isolation from one another This can lead to a limited and simplistic understanding of the international and interreligious interactions currently taking place This edited collection brings these national and religious narratives into conversation with each other helping readers to formulate a more sophisticated comprehension of the social and cultural factors involved in the tolerance and intolerance that has taken place in these areas and continues today Part

One of this volume examines the history of relations between people of different Christian confessions in western and central Europe Part Two then looks at the relations between Western and Eastern Orthodox Christianity Islam and Judaism in the vast area that extends around the Mediterranean from the Iberian Peninsula to western Asia Each Part ends with a Conclusion that considers the wider implications of the preceding essays and points the way toward future research Bringing together scholars from Asia the Middle East Europe and America this volume embodies an international collaboration of unusual range Its comparative approach will be of interest to scholars of Religion and History particularly those with an emphasis on interreligious relations and religious tolerance
