Patients were randomly assigned to treatment with morphine, oxycodone, or placebo. The primary outcome was the proportion of patients who were pain-free at 12 weeks. The secondary outcome was the proportion of patients who were pain-free at 4 weeks. The proportion of patients who were pain-free at 12 weeks was significantly higher in the morphine group than in the oxycodone or placebo groups. The proportion of patients who were pain-free at 4 weeks was significantly higher in the morphine group than in the oxycodone or placebo groups. The proportion of patients who were pain-free at 12 weeks was significantly higher in the morphine group than in the oxycodone or placebo groups. 1. The Commission has received information from the Government of the Republic of the Philippines that the Government is planning to conduct a series of military operations in the area of the Philippine Sea, which may result in the displacement of a large number of persons. The Commission is concerned that these operations may result in the displacement of a large number of persons, and it is therefore requesting the Government to provide information on the number of persons who may be displaced, and the measures that will be taken to ensure that they are not displaced in a manner that would result in their being treated as refugees.
