**Lee Anne Fennell**

## **English Dse 2013 Paper Question:**

Language Across the Curriculum & CLIL in English as an Additional Language (EAL) Contexts Angel M.Y. Lin, 2016-09-15

This book will be of interest to a broad readership regardless of whether they have a background in sociolinguistics functional linguistics or genre theories It presents an accessible meta language i e a language for talking about language that is workable and usable for teachers and researchers from both language and content backgrounds thus facilitating collaboration across content and language subject panels Chapters 1 to 3 lay the theoretical foundation of this common meta language by critically reviewing systematically presenting and integrating key theoretical resources for teachers and researchers in this field In turn Chapters 4 to 7 focus on issues in pedagogy and assessment and on school based approaches to LAC and CLIL drawing on both research studies and the experiences of front line teachers and school administrators Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge In closing Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry

### **Slices &**

**Lumps** Lee Anne Fennell, 2019-09-16 How things are divided up or pieced together matters Half a bridge is of no use at all Conversely many things would do more good if they could be divided up differently Perhaps you would prefer a job that involves a third less work and a third less pay or a car that materializes only when needed and is priced accordingly Difficulties in slicing and lumping shape nearly every facet of how we live and work and a great deal of law and policy as well Lee Anne Fennell explores how both types of challenges carving out useful slices and assembling useful lumps surface in myriad contexts from hot button issues like conservation and eminent domain to developments in the sharing economy to personal struggles over work money time diet and exercise Yet the significance of configuration is often overlooked leading to missed opportunities for improving our lives With a technology fueled entrepreneurial explosion underway that is dividing goods services and jobs in novel ways and as urbanization and environmental threats raise the stakes for assembling resources and cooperation this is an especially exciting and crucial time to confront questions of slicing and lumping The future of the city the workplace the marketplace and the environment all turn on matters of configuration as do the prospects for more effective legal doctrines for better management of finances and health and more This book reveals configuration s power and potential as a unifying concept and as a focus of public and private innovation
