Educational Psychology L.S. Vygotsky,1997-08-11 When this classic book was first published in 1926 L S Vygotsky was well on his way to becoming one of the leading intellectuals in Russia His study of the psychology of education led him to believe that the child should be the main figure in the educational process and the efforts of the teacher should be directed toward organizing not dictating the child s development The educational process must be based on the student s individual activity he states in Educational Psychology and the art of education should involve nothing more than guiding and monitoring this activity At a time when most education consisted of rote memorization and thwacks across the wrist with a ruler these ideas were considered quite radical Today s educators can find much that is of use in the pages of Educational Psychology Vygotsky addresses many issues that are still relevant in the 1990s abnormal social behavior the nurturing of creativity and reasoning problems with attention and memory in a bold and opinionated fashion that is sure to delight educators as well as lovers of classical Russian writing Psychologists will also find the book useful for its fascinating glimpses into the study of psychology in the early twentieth century

Flat-World Fiction Liliana M. Naydan, 2021-12-15 Flat World Fiction analyzes representations of digital technology and the social and ethical concerns it creates in mainstream literary American fiction and fiction written about the United States in the first two decades of the twenty first century In this period authors such as Don DeLillo Jennifer Egan Dave Eggers Joshua Ferris Jonathan Safran Foer Mohsin Hamid Thomas Pynchon Kristen Roupenian Gary Shteyngart and Zadie Smith found themselves not only implicated in the developing digital world of flat screens but also threatened by it while simultaneously attempting to critique it As a result their texts explore how human relationships with digital devices and media transform human identity and human relationships with one another history divinity capitalism and nationality Liliana M Naydan walks us through these complex relationships revealing how authors show through their fiction that technology is political In the process these authors complement and expand on work by historians philosophers and social scientists creating accessible literary road maps to our digital future

*Modern Character* Julian Murphet, 2023-11-27 How was modern character made or remade at the turn of the twentieth century Modern Character 1888 1905 considers a range of literary and dramatic texts showcasing the extraordinary efforts of various writers to rethink and reinvent human character during this period Arguing that many of the most significant breakthroughs happened in the small theatres of Europe in the 1890s the book s first section demonstrates how the countervailing currents of Naturalism and Symbolism created a vortex in which time honoured truisms about character consistency depth and verisimilitude were jettisoned Works by Ibsen Strindberg Maeterlinck and Chekhov provide evidence of a searching and critical campaign against assumed models of characterization The second section turns to contemporary prose narratives with attention to Knut Hamsun Oscar Wilde Joris Karl Huysmans Gabriele D Annunzio Henry James George Egerton Edith Wharton Kate Chopin and Joseph Conrad to ask what writers working in the novel novella and short story forms were doing to contest prevailing expectations about represented persons Inconsistency bad faith fragmentation and unconscious motives creep into the character spaces of these fictions Character description recedes and plots disintegrate a penumbral negativity intrudes just where identification and sympathy might have been achieved Ultimately Julian Murphet proposes that the modern character emerging over this decade and a half presents a radical rethinking of a venerable category of narrative and

Hofmann, 2017-10-23 The first book to offer a truly global perspective on the theory and practice of clinical psychology While clinical psychology is practiced the world over up to now there has been no text devoted to examining it within a global context The first book of its kind *Clinical Psychology A Global Perspective* brings together contributions from clinicians and scholars around the world to share their insights and observations on the theory and practice of clinical psychology Due partly to language barriers and entrenched cultural biases there is little cultural cross pollination within the field of clinical psychology In fact most of the popular texts were written for English speaking European and Anglo American audiences and translated for other countries As a result most psychologists are unaware of how their profession is conceptualized and practiced in different regions or how their own practices can be enriched by knowledge of the theories and modalities predominant among colleagues in other parts of the world This book represents an important first step toward rectifying that state of affairs Explores key differences and similarities in how clinical psychology is conceptualized and practiced with children adolescents and adults across different

countries and cultures Addresses essential research methods clinical interviews psychometric testing neuropsychological assessments and dominant treatment modalities Follows a consistent format with each chapter focusing on a specific area of the practice of clinical psychology while integrating cultural issues within the discussion Includes coverage of how to adapt one's practice to the differing cultures of individual clients and how to work in multidisciplinary teams within a global context Clinical Psychology A Global Perspective is a valuable resource for students trainees and practicing psychologists especially those who work with ethnic minority groups or with interpreters It is also a must read for practitioners who are considering working internationally

*Screen Time* Lisa Guernsey, 2012-03-20 As a mother Lisa Guernsey wondered about the influence of television on her two young daughters As a reporter she resolved to find out What she first encountered was tired advice sensationalized research claims and a rather draconian mandate from the American Academy of Pediatrics no TV at all before the age of two But like many parents she wanted straight answers and realistic advice so she kept digging she visited infant perception labs and child development centers around the country She interviewed scores of parents psychologists cognitive scientists and media researchers as well as programming executives at Noggin Disney Nickelodeon Sesame Workshop and PBS Much of what she found flies in the face of conventional wisdom and led her to conclude that new parents will be best served by focusing on about educational media She examines how play and language development are affected by background and foreground television and how to choose videos that are age appropriate She explains how to avoid the hype of brain stimulation and focus instead on social relationships and the building blocks of language and literacy Along the way Guernsey highlights independent research on shows ranging from Dora the Explorer to Dragon Tales and distills some surprising new findings in the field of child development
