Official Gazette of the United States Patent Office United States. Patent Office,1951 *Embargoed Science* Vincent Kiernan,2023-12-11 The popular notion of a lone scientist privately toiling long hours in a laboratory striking upon a great discovery and announcing it to the world is a romanticized fiction Vincent Kiernan s *Embargoed Science* reveals the true process behind science news an elite few scholarly journals control press coverage through a mechanism known as an embargo The journals distribute advance copies of their articles to hundreds and sometimes thousands of journalists around the world on the condition that journalists agree not to report their stories until a common time several days later When the embargo lifts airwaves and newspaper pages are flooded with stories based on the journal s latest issue In addition to divulging the realities behind this collusive practice Kiernan offers an unprecedented exploration of the embargo s impact on public and academic knowledge of science and medical issues He surveys twenty five daily U S newspapers and relates his in depth interviews with reporters to examine the inner workings of the embargo and how it structures our understanding of news about science Kiernan ultimately argues that this system fosters pack journalism and creates an unhealthy shield against journalistic competition The result is the uncritical reporting of science and medical news according to the dictates of a few key sources

Justice Stephen Field Paul Kens,1997 Outspoken and controversial Stephen Field served on the Supreme Court from his appointment by Lincoln in 1863 through the closing years of the century No justice had ever served longer on the Court and few were as determined to use the Court to lead the nation into a new and exciting era Paul Kens shows how Field ascended to such prominence what influenced his legal thought and court opinions and why both are still very relevant today One of the famous gold rush forty niners Field was a founder of Marysville California a state legislator and state supreme court justice His decisions from the state bench and later from the federal circuit court often placed him in the middle of tense

conflicts over the distribution of the land and mineral wealth of the new state Kens illuminates how Field s experiences in early California influenced his jurisprudence and produced a theory of liberty that reflected both the ideals of his Jacksonian youth and the teachings of laissez faire economics During the time that Field served on the U S Supreme Court the nation went through the Civil War and Reconstruction and moved from an agrarian to an industrial economy in which big business dominated Fear of concentrated wealth caused many reformers of the time to look to government as an ally in the preservation of their liberty In the volatile debates over government regulation of business Field became a leading advocate of substantive due process and liberty of contract legal doctrines that enabled the Court to veto state economic legislation and heavily influenced constitutional law well into the twentieth century In the effort to curb what he viewed as the excessive power of government Field tended to side with business and frequently came into conflict with reformers of his era Gracefully written and filled with sharp insights Kens study sheds new light on Field s role in helping the Court define the nature of liberty and determine the extent of constitutional protection of property By focusing on the political economic and social struggles of his time it explains Field s jurisprudence in terms of conflicting views of liberty and individualism It firmly establishes Field as a persuasive spokesman for one side of that conflict and as a prototype for the modern activist judge while providing an important new view of capitalist expansion and social change in Gilded Age America **Annual Report of the State Board of Conciliation and Arbitration for the Year Ending ...** Massachusetts.
