**The Report: Kenya 2014** Oxford Business Group,2014-11-13 The country has a strong private sector and received encouraging forecasts of new oil gas and water reserves which if harnessed appropriately bode well for future growth While a pending international court case resulting from prior elections provoked a measure of uncertainty the country s medium to long term economic outlook is robust With over 40% of the population under the age of 15 Kenya stands to benefit from a significant demographic dividend provided that sufficient jobs can be found when this population bulge enters the workforce The country has a reasonably sized industrial base competitive infrastructure and a large agricultural sector all of which offer opportunities for capital intensive investment

**Kama Muta** Alan Page Fiske,2019-11-26 This book describes a ubiquitous and potent emotion that has only rarely and recently been studied in any systematic manner The words that come closest to denoting it in English are being moved or touched having a heart warming feeling feeling nostalgic feeling patriotic or pride in family or team In religious contexts when the emotion is intense it may be labeled ecstasy mystical rapture burning in the bosom or being touched by the Spirit All of these are instances of what scientists now call kama muta Sanskrit moved by love Alan Page Fiske shows that what evokes this emotion is the sudden creation intensification renewal repair or recall of a communal sharing relationship when love ignites or people feel newly connected He explains the social psychological cultural and likely evolutionary processes involved and how they interlock Kama muta is described as it manifests in diverse settings at many points in history across scores of cultures in everyday experiences as well as the peak moments of life The chapters illuminate the occurrence of kama muta in a range of contexts including religion oratory literature sport social media and nature The book will be of interest to students and scholars from a number of disciplines who are interested in emotion or social relationships Supplementary notes can be found online at [www.routledge.com/9780367220945](http://www.routledge.com/9780367220945)

**Cultural Sustainability and Arts Education** Benjamin Jörissen,Lisa Unterberg,Tanja Klepacki,2023-01-01 This book is based on the topics questions and results of the international conference Aesthetics of Transformation Arts Education Research and the Challenge of Cultural Sustainability It aims to foster and sharpen the understanding of the potential role of arts education and arts education research for cultural sustainability In an ever more complex and interconnected world culture is a valuable resource for sustainable development Based on the thesis that the change towards sustainability has to be a change that starts with cultural practices of perception and knowledge this book makes an important contribution to the broad discourse on cultural sustainability which has begun to emerge in recent years In this context the volume first deals with Intangible Cultural Heritage and how aesthetic practices and certain forms of art are changing through cultural transformation processes Subsequently it focuses on issues such as arts and cultural education in times of neoliberalism post migration and post coloniality as well as on arts and cultural education under conditions of

digital transformation These theoretical and empirical contributions are complemented by insights into field trips to institutions and exemplary places of practice showing different representations of educational art practices cultural heritage and cultural sustainability Against this background the book finally offers responses and commentaries that can form the starting point for a far reaching interactive dialogical process on the utmost importance of cultural aesthetic and arts education as part of a global endeavor for sustainable development

**High Speed Semiconductor Physics. Theoretical Approaches and Device Physics** Cliff Orori Mosiori, 2015-05-26 Solid state physics is a fascinating sub genre of condensed matter physics though some graduate students consider it a very boring and tedious subject area in Physics and others even call it a squalid state Topics covered in this book are built on standard solid state physics references available in most online libraries or in other books on solid state physics The complexity of high speed semiconductor physics and related devices arose from condensed solid state matter The content covered in this book gives a deep coverage on some topics or sections that may be covered only superficially in other literature Therefore these topics are likely to differ a great deal from what is deemed important elsewhere in other books or available literature There are many extremely good books on solid state physics and condensed matter physics but very few of these books are restricted to high speed semiconductor physics though Chapter one covers the general semiconductor qualities that make high speed semiconductor devices effect and includes the theory of crystals diffusion and its mechanisms while chapter two covers solid state materials material processing for high speed semiconductor devices and an introduction to quantum theory for materials in relation to density of states of the radiation for a black body and its radiation properties Chapter three discuss high speed semiconductor energy band theory energy bands in general solid semiconductor materials the Debye model the Einstein model the Debye model and semiconductor transport carriers in 3D semiconductors while chapter four discuss effect of external force on current flow based on the concept of holes valence band and lattice scattering in high speed devices Chapter five briefly describes solid state thermoelectric fundamentals thermoelectric material and thermoelectric theory of solids in lattice and phonons while chapter six scattering in high field effect in semiconductors in inter valley electron scattering and the associated Fermi Dirac statistics and Maxwell Boltzmann approximation on their carrier concentration variation with energy in extrinsic doping chapter seven covers p n junction diodes varactor diode pin diode Schottky diode and their transient response of diode in multi valley semiconductors Chapter eight discusses high speed metal semiconductor field effect transistors

**Higher Education Leadership and Governance in the Development of the Creative and Cultural Industries in Kenya** Akuno, Emily, Ondieki, Donald Otoy, 2017-05-05 The role of higher education in establishing structures and procedures in society and industry is clearly articulated in scholarly discussions The narrative has recently taken a new momentum in Kenya with acknowledgement of the creative industry involves many youth as an area that impacts on the economy In unravelling the link between higher education and industry the authors focus on leadership and governance in higher education and its expected and perceived contribution to the shaping of the creative industry Through analysis of cases the authors interrogate the processes and structures that govern the teaching and practice of the creative subjects noting how these affect the creative industry in Kenya This book approaches the creative disciplines from the perspectives of the students lecturers and university administrators The three voices provide a balanced view of what higher creative arts education in Kenya is The multiple authorship of the book further provides a balanced account of the development of these disciplines in higher education and their growth in industry The key concepts here are the development of the creative industry and how higher education should contribute to the same

*International Yearbook for Research in Arts Education* 4/2016 Aud Berggraf Sæbø, 2016 This yearbook is the fourth in an annual series of publications by the International Network for Research in Arts Education INRAE INRAE aims to disseminate high quality international research in arts education related to the implementation of UNESCO s Seoul Agenda Goals for the development of arts education This yearbook reflects the growing practice around the world of interchanging the terms arts education and cultural education to such an extent that they may eventually be regarded as nearly synonymous We question if there are differences and how arts and cultural education may be interwoven in different regions of the world With this in mind we want to reconsider fundamental questions of what arts education is about Some authors write from a general more global perspective while others are concerned with challenges within one specific art subject or with particular reference to developments in their own country Overall the articles analyse and discuss the possibilities and challenges of arts and cultural education around the world

*Handbook of Research on Transformative and Innovative Pedagogies in Education* Keengwe, Jared, 2022-05-13 Various pedagogies such as the use of digital learning in education have been used and researched for decades but many

schools have little to show for these initiatives This contrasts starkly with technology supported initiatives in other fields such as business and healthcare Traditional pedagogies and general digital technology applications have yet to impact education in a significant way that transforms learning A primary reason for this minimal impact on learning is that digital technologies have attempted to make traditional instructional processes more efficient rather than using a more appropriate paradigm for learning As such it is important to look at digital technology as a partner and use transformative applications to become partners with students not teachers to empower their learning process both in and out of school The Handbook of Research on Transformative and Innovative Pedagogies in Education is a comprehensive reference that identifies and justifies the paradigm of transformative learning and pedagogies in education It provides exemplars of existing transformative applications that if used as partners to empower student learning have the potential to dramatically engage students in a type of learning that better fits 21st century learners Covering topics such as gamification project based learning and professional development this major reference work is an essential resource for pre service and in service teachers educational technologists instructional designers educational administration and faculty researchers and academicians seeking pedagogical models that inspire students to learn meaningfully
