Oceanic Histories David Armitage, Alison Bashford, Sujit Sivasundaram, 2018 Freshly presents world history through its oceans and seas in uniquely wide ranging original chapters by leading experts in their fields.

Jules Verne Timothy Unwin, 2005-10-01 A hundred years after his death Jules Verne 1828-1905 has in the popular imagination become synonymous with prediction of the future. Yet the actual texts of Verne's major novels, the vast series known as the Voyages extraordinaires, still remain unknown to many. In the English speaking world translations of Verne's best known novels *Around the World in Eighty Days*, *Twenty Thousand Leagues under the Seas*, *Journey to the Centre of the Earth*, *From the Earth to the Moon* have often contained wholesale distortions of his plots and characters and the popular and false image of Verne as a foreteller of the future often comes not through what he actually wrote but through films and other adaptations of his work. It is against this background of misrepresentation and misconception that the present study has been produced. Verne, as Unwin argues, was a master of the self-conscious novel, his work a pastiche of science discourse, fictional and non-fictional writings and flamboyant theatrical narrative. Unwin makes a compelling case for Verne as a master of the nineteenth century experimental novel in the company of Gustave Flaubert and other canonical French writers. The text will be a wonderful addition to the shelves of those interested in science fiction, experimental writing and critical theory.

Jules Verne on Film Thomas C. Renzi, 2004-03-24 Jules Verne. Voila a name that resonates with visions of fantastic adventures and images of exotic exploits. In his *voyages extraordinaires* the noted French author fuses his encyclopedic knowledge of science and geography with his ability to tell fascinating tales, taking his readers on unprecedented journeys across the globe, into the earth and out into space. This revered writer, who with his boundless imagination had hoped to contribute substantially to the world of letters, has surpassed that expectation to become coincidentally a significant influence on film. *Jules Verne on Film* is both a penetrating analytical overview of Verne's epic novels and a comprehensive filmography of the numerous films inspired by his stories and characters. There are the obvious adaptations that come directly from the pages of Verne's writings, films such as *In Search of the Castaways* and *Mysterious Island*. However, looking closely at the plots, characters and themes of many other films, science fiction and otherwise, one discovers that the incomparable Verne has had a far wider influence on filmmakers than one might have thought. For instance, most of us are familiar with Disney's *20,000 Leagues Under the Sea* (1954) and some of us may have even seen the two 1997 television productions. But Verne's classic undersea adventure also provides the underpinnings for such entertaining movies as *Fantastic Voyage* (1966) and *Innerspace* (1987). Structurally *Jules Verne on Film* begins with a biographical sketch and contains 23 chapters arranged alphabetically.

according to book title starting with *The Adventures of Captain Hatteras* and ending with *Voyage Across the Impossible* Each chapter includes a summary and analysis of Verne's story followed by a chronological treatment of the cinematic adaptations compared to their respective written work Production credits appear in the film entries along with plot synopses and thorough critical commentaries
