

CLEANING INSTRUCTIONS

If the pressure gauge on your filter reads 1 PSI or higher than the original starting pressure, the filter needs to be cleaned. To clean the filter:

1. Turn off pump. **Warning: Never attempt to clean filter while pump is running. This is a pressurized vessel. It could cause severe injury or harm to your person. Plug skimmer and pool return lines, OR Drain pool water level to below pool return line.**
2. Slowly open the air relief valve on top of filter until the pressure gauge reads "0". All pressure must be released before opening Filter. Open drain cap at bottom of filter and allow water to flow.
3. Press the yellow safety latch on the underside of the lock nut and turn the lock nut counter-clockwise to remove the lock nut. Then pull the lid off of the filter by using the handle. Rinse the cartridge element with a garden hose. There is no need to remove the element from the filter. For a more thorough cleaning, disassemble Cartridge Internal Assembly by unscrewing Tie Nut (10a) and removing Upper Plate (10b). Lift the Cartridge over the Filter Internal and clean with a garden hose. Replace Cartridge and Upper Plate and screw Tie Nut onto Filter Internal.
4. Reassemble lid making sure to hear the "Click" when turning the lock nut. The "Click" means the lid has been correctly installed. If you do not hear a click, remove the lock nut and try again because the lock nut may be cross-threaded. Cross-threading could result in damage to the Filter Body. Follow start-up procedures from original instructions.

(Only Original Starting Pressure is _____ PSI (Pounds per Square Inch).
I should clean the filter at _____ PSI.
