Practical Approach to Substrate Integrated Waveguide (SIW) Diplexer: Emerging Research and Opportunities

Nwajana, Augustine Onyenwe, Yeo, Kenneth Siok Kiam, 2020-02-07 Substrate integrated waveguide SIW technology is a twenty first century transmission line that has evolved recently to open new doors to the development of efficient circuits and devices operating in the microwave and millimeter wave frequency range Microstrip circuits and devices are inefficient at high frequency applications and require very stringent manufacturing tolerances when used to implement microwave and millimeter wave components This is as a result of the fact that wavelengths are short at higher frequencies Waveguide circuits and devices are preferred for higher frequency applications but they are expensive and difficult to manufacture It is also very challenging to integrate a waveguide device with planar devices in its vicinity The SIW bridges the gap between the traditional air filled waveguide and planar transmission lines such as microstrip Practical Approach to Substrate Integrated Waveguide SIW Diplexer Emerging Research and Opportunities is an essential reference source that discusses the development of efficient circuits and devices operating in the microwave and millimeter wave frequency range through the use of substrate integrated waveguides Featuring research on topics such as microstrip resonators circuit model analysis and quality factor extraction this book is ideally designed for researchers engineers scientists developers scholars practitioners educators policymakers and students

Manufacturing Process Planning José V. Abellán-Nebot, Carlos Vila

Pastor, Héctor R. Siller, 2025-02-04 Comprehensive introduction to manufacturing process planning in the context of the latest techniques being used in industry Manufacturing Process Planning is a comprehensive guide to the intricacies of the manufacturing planning process that leads readers through each stage of planning while providing practical examples that illustrate the manufacturing activities taking place at every juncture Beginning with the fundamentals the book bridges the gap between technical documents and product specifications and how the information they contain can be effectively applied on the shop floor The book focuses around four key areas selection of manufacturing processes process planning in sand casting process planning in machining and process planning in inspection Each chapter highlights best practices for activities such as casting mold design machining sequence identification geometrical validation CNC programming the preparation of inspection reports and more Special attention is paid to manufacturing cost estimation and pricing ensuring that the production process is not only feasible but also cost effective To enhance the learning experience the book comes complete with an active learning project brief and tutorial sessions covering casting simulation pattern design and CNC simulation using freely available software Manufacturing Process Planning includes information on Fundamentals of casting including heating the metal pouring the molten metal solidification and cooling determining casting quality and performing cleaning operations Definition and selection of workholding systems covering principles of workholding types of workholding systems and general purpose of workholding devices for turning and milling Machine and cutting tool selection and process

parameter selection covering specific guidelines in turning milling and drilling Documents for process planning including process flow charts routing sheets and operation and tooling lists Providing a hands on approach to mastering the principles of manufacturing process planning Manufacturing Process Planning is an ideal resource for undergraduate and graduate academic courses that incorporate a lab component as well as production planning supervisors and managers looking to hone their knowledge base

Advanced Practical Approaches to Web Mining Techniques and Application Obaid, Ahmed J., Polkowski, Zdzislaw, Bhushan, Bharat, 2022-03-18 The rapid increase of web pages has introduced new challenges for many organizations as they attempt to extract information from a massive corpus of web pages Finding relevant information eliminating irregular content and retrieving accurate results has become extremely difficult in today's world where there is a surplus of information available It is crucial to further understand and study web mining in order to discover the best ways to connect users with appropriate information in a timely manner Advanced Practical Approaches to Web Mining Techniques and Application aims to illustrate all the concepts of web mining and fosters transformative multidisciplinary and novel approaches that introduce the practical method of analyzing various web data sources and extracting knowledge by taking into consideration the unique challenges present in the environment Covering a range of topics such as data science and security threats this reference work is ideal for industry professionals researchers academicians practitioners scholars instructors and students

AI Solutions for the United Nations Sustainable Development Goals (UN SDGs) Tulsi Pawan Fowdur, Lavesh Babooram, 2024-12-17 Learn the United Nations Sustainable Development Goals UN SDGs and see how machine learning can significantly contribute to their realization This book imparts both theoretical knowledge and hands on experience in comprehending and constructing machine learning based applications for addressing multiple UN SDGs using JavaScript The reading begins with a delineation of diverse UN SDG targets providing an overview of previous successful applications of machine learning in solving realistic problems aligned with these targets It thoroughly explains fundamental concepts of machine learning algorithms for prediction and classification coupled with their implementation in JavaScript and HTML programming Detailed case studies examine challenges related to renewable energy agriculture food production health environment climate change water quality air quality and telecommunications corresponding to various UN SDGs Each case study includes related works datasets machine learning algorithms programming concepts and comprehensive explanations of JavaScript and HTML codes used for web based machine learning applications The results obtained are meticulously analyzed and discussed showcasing the pivotal role of machine learning in advancing the relevant SDGs By the end of this book you will have a firm understanding of SDG fundamentals and the practical application of machine learning to address diverse challenges associated with these goals What You Will Learn Understand the fundamental concepts of the UN SDGs AI and machine learning algorithms Employ the correct machine learning algorithms to address challenges on the United Nations Sustainable Development Goals UN SDGs Develop web based machine learning applications for the UN SDGs
