Question 1: You have recently stayed at the Shamrock Hotel and, most surprisingly, you thoroughly enjoyed your stay. Write a letter to Mr and Mrs Doyle explaining the reasons why you liked the hotel so much. You know that the Doyles will use your letter to advertise the hotel in future. Base all that you say on the passage you have read. Write between one and a half and two sides, allowing for the size of your handwriting.

(For this question, 15 marks are allocated to assessment of Reading Objectives R1-R3 (see syllabus); 5 marks are allocated to assessment of Writing Objectives W1-W5 (see syllabus).)

General notes on possible content

Candidates should find some features from the passage that can be used as reasons for enjoying a visit to the Shamrock and should develop reasons for their appeal. Mark **A** for attraction and **Dev** for development (in margin). Be aware of tongue-in-cheek answers, which are just as valid.

Look for a neatly thought out answer that recognises a range of opportunities from a thorough reading of the passage.

Alternative answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated. The content must be clearly related to and derived from the passage.

Candidates may use the following:

- 1 The hotel is isolated, therefore a peaceful atmosphere / laid-back / informal
- 2 (a) The architecture could be interpreted as original, unspoilt, even historic or 'charmingly naive' / reference to architects, artists etc.
(b) The colouring might be interpreted as attractive shades of yellow brick with a green roof and shutters (not 'bilious').
- 3 (a) The presence of animals; rural atmosphere, good for children.
(b) Free range hens produce eggs for breakfast; home-cooking.
(c) Pets allowed
- 4 Cost: as stated, 'lowest current rates'.
- 5 Bed (testing!); maybe comment on soothing farmyard sounds, most likely 'newly refurbished'.
- 6 People
(i) cockatoo farmer: provides company or a reference; interesting local characters
(ii) Mr Doyle: humorous (company); good for a 'spree'; comes from a good family; exotic history
(iii) Mrs Doyle: kindly? Good with trousers, perhaps repairs to clothing.
- 7 Close to the road; convenient on a long journey.
- 8 Reference to rubbish left 'artistically' lying about.

Cross-linguistic Investigations of Nominalization Patterns Ileana Paul, 2014-02-15 The chapters in this volume address current topics in the morphology syntax and semantics of nominalizations drawing on a range of typologically and geographically diverse languages Nominalizations represent a long standing puzzle to linguists How is a noun such as destruction related to the verb destroy The semantic parallel between the deverbal nominalization and its related verb suggests that there is a close connection between the two This volume contributes to the ongoing debates on how to capture this connection and how to account for the apparent mixed categorical status of nominalizations This volume is essential for students and researchers interested in the morphology syntax and syntax semantics interfaces The Wealth of a Nation Geoffrey M. Hodgson, 2023-09-26 In this book one of the most respected experts on the conceptual definition of capitalism traces its origins to England and shows the massive transformation that took place in the country until the early nineteenth century This book considers the reasons for the dramatic rise in economic activity and offers a conceptual framework to help to explain the evolution of the foundational institutions of English capitalism Hodgson s unique perspective lies in his understanding of capital as finance and not goods and he shows how in this light what was developed in Britain in the eighteenth century was capitalism For Hodgson the central importance lies in institutions that enable the raising of money for innovation and investment but he argues economists have paid insufficient attention to the institutional conditions required This book offers a novel and authoritative account of the events and processes that led to the consolidation of capitalism in England whose features were copied and adapted by other countries around the world *Diplomatic Style and Foreign Policy* Jeffrey Robertson, 2016-05-20 The book explores diplomatic style and its use as a means to provide analytical insight into a state s foreign policy with a specific focus on South Korea Diplomatic style attracts scant attention from scholars It is dismissed as irrelevant in the context of diplomacy s universalism misconstrued as a component of foreign policy alluded to perfunctorily amidst broader considerations of foreign policy or wholly absented from discussions in which it should comprise an important component In contrast to these views practitioners maintain a faith like confidence in diplomatic style They assume it plays an important role in providing analytical insight giving them advantage over scholars in the analysis of foreign policy This book explores diplomatic style and its use as a means to provide analytical insight into foreign policy using South Korea as a case study It determines that style remains important to diplomatic practitioners and provides analytical insight into a state s foreign policy by highlighting phenomena of policy relevance which narrows the range of information an analyst must cover The book demonstrates how South Korea s diplomatic style which has a tendency towards emotionalism and is affected by status generational change cosmopolitanism and estrangement from international society can be a guide to understanding South Korea s contemporary foreign policy This book will be of much interest to students of diplomacy studies foreign policy Asian politics and International Relations in general **Learning to Teach**

Tuteja, Kaustav Chakraborty, 2017-03-15 This volume brings together eminent Tagore scholars and younger writers to revisit the concepts of nation nationalism identity and selfhood civilization culture and homeland in Tagore s writings As these ideas take up the centre stage of politics in the subcontinent as also elsewhere in the world in the 21st century it becomes extremely relevant to revisit his works in this context Tagore s ambivalence towards nationalism as an ideology was apparent in the responses in his discussions with Indians and non Indians alike Tagore developed the concept of syncretic civilization as a basis of nationalist civilizational unity where society was central unlike the European model of state centric civilization However as the subterranean tensions of communalism became clear in the early 20th century Tagore reflexively critiqued his own political position in society He thus emerged as the critic of the nation nation state and in this he shared his deep unease with other thinkers like Romain Rolland and Albert Einstein This volume for the first time covers the socio political historical literary and cultural concerns relating to Tagore s efforts towards the de colonization of the Self The volume begins with various perspectives on Tagore s ambivalence about nationalism It encompasses critical examinations of Tagore s literary works and other art forms as well as adaptations of his works on film It also reads Tagore s nationalism in a comparative mode with contemporary thinkers in India and abroad who were engaged in similar debates **Art in England**

Sara N. James, 2016-10-31 Art in England fills a void in the scholarship of both English and medieval art by offering the first single volume overview of artistic movements in Medieval and Early Renaissance England Grounded in history and using the chronology of the reign of monarchs as a structure it is contextual and comprehensive revealing unobserved threads of continuity patterns of intention and unique qualities that run through English art of the medieval millennium By placing the English movement in a European context this book brings to light many ingenious innovations that focused studies tend not

to recognize and offers a fresh look at the movement as a whole The media studied include architecture and related sculpture both ecclesiastical and secular tomb monuments murals panel paintings altarpieces and portraits manuscript illuminations textiles and art by English artists and by foreign artists commissioned by English patrons *The Evolution of Economies* Patrick Spread, 2015-12-22 It is clear even to casual observation that economies evolve from year to year and over centuries Yet mainstream economic theory assumes that economies always move towards equilibrium One consequence of this is that mainstream theory is unable to deal with economic history The Evolution of Economies provides a clear account of how economies evolve under a process of support bargaining and money bargaining Both support bargaining and money bargaining are situation related people determine their interests and actions by reference to their present circumstances This gives the bargaining system a natural evolutionary dynamic Societies evolve from situation to situation Historical change follows this evolutionary course A central chapter of the book applies the new theory in a re evaluation of the industrial revolution in Britain showing how specialist money bargaining agencies in the form of companies evolved profitable formats and displaced landowners as the leading sources of employment and economic necessities Companies took advantage of the evolution of technology to establish effective formats The book also seeks to establish how it came about that a mainstream theory was developed that is so wildly at odds with the observable features of economic history and economic exchange Theory making is described as a process of intellectual support bargaining in which theory is shaped to the interests of its makers The work of major classical and neoclassical economists is contested as incompatible with the idea of an evolving money bargaining system The book reviews attempts to derive an evolutionary economic theory from Darwin's theory of evolution by natural selection Neoclassical economic theory has had enormous influence on the governance of societies principally through its theoretical endorsement of the benefits of free markets An evolutionary account of economic processes should change the basis of debate The theory presented here will be of interest immediately to all economists whether evolutionary heterodox or neoclassical It will facilitate the work of economic historians who complain that current theory gives no guidance for their historical investigations Beyond the confines of professional theory making many will find it a revelatory response to questions that have hitherto gone unanswered Financial Development and Cooperation in Asia and the Pacific Edward K. Y. Chen, Wendy Dobson, 2014-11-13 The 1997-8 Asian financial crisis exposed weaknesses in the region's national financial systems but since then East Asia has become the world's most dynamic economic region Domestic financial systems have developed cross border financial flows within the region are growing apace as demand from governments and large firms increases and as the capabilities of financial institutions develop and governments have initiated regional cooperation aimed at preventing future crises and managing them if they occur This book examines the economies of Asia and the Pacific with reference to financial reform and liberalization monetary policy frameworks banking and capital markets regulation and supervision and macroeconomic policies Further it asks what lessons have been learned

from both the Asian financial crisis and the recent financial crisis how to engender financial stability in the region and how to ensure that the benefits of economic growth and financial development reach all members of society Across four key sections the chapters examine the future implications of historical studies of the relationships between financial development and growth financial development including banks non bank financial institutions and capital markets how financial stability is being sought in the region and China s plans for capital account opening and renminbi internationalization and subsequent the policy implications for China s neighbours This book draws on papers originally presented to the 36th Pacific Trade and Development Conference held in Hong Kong in 2013 and features contributions from leading academics and economists from around the world As such it will be of great interest to students and scholars of Asian economics Asia Pacific studies international economics and international finance
