Draft of Mindsets Essay #1

The microsystems of the home, school, and community can significantly impact a student's belief in their ability to succeed in an academic environment. This is evident in the research of Carol Dweck, who found that students with a growth mindset, or the belief that intelligence can be developed through effort, are more likely to persevere and succeed in challenging academic situations, while those with a fixed mindset, or the belief that intelligence is fixed and cannot be changed, are more likely to struggle and give up.

Mike Rose's "I Just Wanna Be Average" highlights the role that the home and community microsystems can play in shaping a student's mindset. Rose discusses the experiences of students in a vocational education program, many of whom come from disadvantaged backgrounds and have received negative messages about their academic potential. These negative messages can lead to the development of a fixed mindset, which can ultimately hinder a student's success in school.
