poor people Because we can't recognize something we can't name she proposes the term aporophobia for the pervasive exclusion stigmatization and humiliation of the poor which cuts across xenophobia racism antisemitism and other prejudices Passionate and powerful Aporophobia examines where this nearly invisible daily attack on poor people comes from why it is so harmful and how we can fight it Aporophobia traces this universal prejudice's neurological and social origins and its wide ranging pernicious consequences from unnoticed hate crimes to aporophobia's threat to democracy It sheds new light on today's rampant anti immigrant feeling which Cortina argues is better understood as aporophobia than xenophobia We reject migrants not because of their origin race or ethnicity but because they seem to bring problems while offering nothing of value And this is unforgivable in societies that enshrine economic exchange as the supreme value while forgetting that we can't create communities worth living in without dignity generosity and compassion for all Yet there is hope and Cortina explains how we can overcome the moral social and political disaster of aporophobia through education and democratic institutions and how poverty itself can be eradicated if we choose In a world of migrant crises and economic inequality Aporophobia is essential for understanding and confronting one of the most serious problems of the twenty first century

Propositions Joe L. Rempson,2020-11-19 Rempson takes issue with those who lay the plight of African Americans on racism

not seeing it today as a major obstacle to black progress Rather he traces the origin back to what he terms the African American Garden of Eden In it W E B Dubois outlasted Booker T Washington and fathered a tradition which Rempson argues has produced a victim identity and an emphasis on the system rather than the self Only black males offer a way out he declares because it is entirely our black males who are keeping us down and curtailing our progress in contrast to black females who are doing OK They are plagued by what Rempson calls the African American Male School Adaptability Crisis AMSAC Their academic performance ranks at the bottom alone below black female students and below white Asian and Hispanic male students In large urban areas their high school dropout rate is 59 percent and nationally they lag behind in college attendance and graduation rates The outcome Rempson argues is dysfunctionality and the existence of hedonistic norms which hinder family and community stability But while black males are the problem Rempson contends it is nevertheless only they who can solve it because research and experience show that it takes males to bring up and change other males Though intended for everyone he therefore writes his book to his fellow advantaged black males and makes a passionate plea for them to step up and with the help of black females and of the nation take the lead As their guide he has formulated eight propositions Arrived at through an examination of impressively extensive data from numerous sources and disciplines they are a marked departure from the customary Most strikingly delicate matters such as those which pertain to intelligence quotient IQ and culture are openly confronted and dealt with But Rempson writes unless confronted we will not solve our problems Nor he continues can we solve them unless we cut the umbilical cord to white America We have no right to expect it to be our savior nor are we justified in perceiving it as our oppressor Forcefully and finely written Rempson s book is a singular and courageous contribution Alone his eight propositions make it a worthy read
