Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Advances in Fluid-Structure Interaction Marianna Braza, Alessandro Bottaro, Mark Thompson, 2016-04-07 This book addresses flow separation within the context of fluid structure interaction phenomena. Here new findings from two research communities focusing on fluids and structures are brought together, emphasizing the importance of a unified multidisciplinary approach. The book covers the theory, experimental findings, numerical simulations and modeling in fluid dynamics and structural mechanics for both incompressible and compressible separated unsteady flows. There is a focus on the morphing of lifting structures in order to increase their aerodynamic and/or hydrodynamic performances to control separation and to reduce noise, as well as to inspire the design of novel structures. The different chapters are based on contributions presented at the ERCOFTAC Symposium on Unsteady Separation in Fluid Structure Interaction held in Mykonos, Greece, 17-21 June 2013, and include extended discussions and new highlights. The book is intended for students, researchers and practitioners in the broad field of computational fluid dynamics and computational structural mechanics. It aims at supporting them while dealing with practical issues such as developing control strategies for unsteady separation and applying smart materials and biomimetic approaches for design and control.

The Routledge Handbook on Cities of the Global South Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism. This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production, as well as a diversity of empirical entry points to understand contemporary urban dynamics. The Handbook works towards a geographical realignment in urban studies, bringing into conversation a wide array of cities across the global south, the ordinary, mega, global and peripheral. With interdisciplinary contributions from a range of leading international experts, it profiles an emergent and geographically diverse body of work. The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south, arguments that are fluid and increasingly contested geographically and conceptually. It reflects on critical urbanism, the macro and micro scale forces that shape cities, including ideological, demographic and technological shifts, and constantly changing global and regional economic dynamics. Working with southern reference points, the chapters present themes in urban politics, identity and environment in ways that re-frame our thinking about cities. The

Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Women's Empowerment and Son Preference in India Sheela Suryanarayanan, 2025-06-01. Sex selective abortions are unjust, unethical and illegal in India yet the experience of motherhood for pregnant women can be influenced by son preference from those who support female feticide. Women are denied agency in exercising reproductive rights and the medical fraternity often fosters the misuse of technologies for sex selective abortions in India. This book reviews the feminist ethical and legal discourse on sex selective abortions and draws on women's empowerment as an analytical lens to examine the son preference expressed in the notion of Vansh lineage among pregnant women, their partners and mothers-in-law in three Indian states.
