Advanced Surface Coating Techniques for Modern Industrial Applications Roy, Supriyo, Bose, Goutam Kumar, 2020-09-18 In engineering there are often situations in which the material of the main component is unable to sustain long life or protect itself from adverse operating environments Moreover in some cases different material properties such as anti friction and wear anti corrosive thermal resistive super hydrophobic etc are required as per the operating conditions If those bulk components are made of such materials and possess those properties the cost will be very high In such cases a practical solution is surface coating which serves as a protective barrier to the bulk material from the adverse environment In the last decade with enormous effort researchers and scientists have developed suitable materials to overcome those unfavorable operating conditions and they have used advanced deposition techniques to enhance the adhesion and surface texturing of the coatings Advanced Surface Coating Techniques for Modern Industrial Applications is a highly sought reference source that compiles the recent research trends

in these new and emerging surface coating materials deposition techniques properties of coated materials and their applications in various engineering and industrial fields The book particularly focuses on 1 coating materials including anti corrosive materials and nanomaterials 2 coating methods including thermal spray and electroless disposition and 3 applications such as surface engineering and thin film application The book is ideal for engineers scientists researchers academicians and students working in fields like material science mechanical engineering tribology chemical and corrosion science bio medical engineering biomaterials and aerospace engineering Historical Dictionary of Kenya Michael Mwenda Kithinji, 2024-06-18 Kenya has a rich and complex history Due to the vast discoveries of prehistoric archaeological remains Kenya is one of the few places in the world with the largest and most complete record of human s cultural development Furthermore the country s strategic location astride the Indian Ocean and the East African littoral attracted numerous foreigners such as the Arabs Persians Portuguese Americans British Chinese French and Germans Additionally immigrants from throughout Africa and beyond have settled in Kenya to escape conflict or political persecution while others wanted an opportunity to begin a new life As a result of being a gateway to the world the country traditionally has been one of the most important business cultural diplomatic and political centers in Africa Still Kenya like many other countries throughout the world has been plagued by an increasing array of complex economic political and social challenges Historical Dictionary of Kenya Fourth Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 500 cross referenced entries on important personalities as well as aspects of the country s politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Kenya *Statistical Abstract* ,2016 **The Unrules** Igor Tulchinsky, 2018-09-24 Learn from a master of quantitative finance the rules that made him a success The UnRules presents the dynamic rules for success in the age of exponential information Written by Igor Tulchinsky the trader behind global quantitative investment management firm WorldQuant this book is more than just another Big Data guide for financial wonks it s a prescriptive inspirational book for everyone navigating the tidal waves of the information age Data is everywhere coming at us in a never ceasing ever rising river that threatens to overwhelm us Tulchinsky shows us however how natural patterns underlie that data patterns that may dictate life or death success or failure The marriage of man and machines has allowed scientists to explore increasingly complex worlds to predict outcomes and eventualities This book demonstrates how to exercise real intelligence by discerning the patterns that surround us every day and how to leverage this information into success in the workplace and beyond Igor Tulchinsky has spent his career discerning meaningful patterns in information For decades Tulchinsky has been at the forefront of developing predictive trading algorithms known as alphas a quest that has led Tulchinsky to explore the nature of markets the fundamentals of risk and reward and the science behind complex nonlinear systems Tulchinsky explains what we know of these systems both natural and man made in accessible and personal terms and he shares how alphas have driven

his success as an investor and shaped his central UnRule which is that no rule applies in every case As markets evolve even the most effective trading algorithms weaken over time Decades of creating successful alphas and learning how to effectively transform them into strategies have taught Tulchinsky about the need to combine flexibility and focus discipline and creativity when building complex models At a time when data and computing power are exploding exponentially The UnRules provides an expert introduction to our increasingly quantitative world *New Models for Technical and Vocational Education and Training* Makgato, Moses, Afeti, George, 2020-12-18 Technical and vocational education and training at technical schools are major contributing factors in combating poverty unemployment and inequality The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace As the Fourth Industrial Revolution continues to create more radical changes in the labor market experts are calling for a reform of education including vocational education and training and adult and professional education *New Models for Technical and Vocational Education and Training* is an essential scholarly research book that examines TVET and CET colleges and programs that provide intermediate skills to enhance students chances of employability and entrepreneurship in Industry 4.0 The book explores knowledge in respect to workforce preparation digital skills development teaching and learning of TVET flexibility and articulation of TVET to respond to work integrated learning and reskilling and upskilling to avoid skill mismatches It is ideal for TVET schools academicians curriculum designers managers training officers administrators vocational professionals researchers and students
