

Industrial Revolution Study Guide

Essential Understanding

The Industrial Revolution began in England, spreading to the rest of Western Europe and the United States. With the Industrial Revolution, came an increased demand for raw materials from the Americas, Asia, and Africa. Advancements in technology produced the Industrial Revolution, while advancements in science and medicine altered the lives of people living in the new industrial cities. Cultural changes soon followed.

Agricultural economies were based on the family unit. The Industrial Revolution had a significant impact on the structure and function of the family. The Industrial Revolution placed new demands on the labor of men, women, and children. Workers

organized labor unions to fight for improved working conditions and workers' rights.

Capitalism and market competition fueled the Industrial Revolution. Wealth increased the standard of living for some. Social dislocations associated with capitalism produced a range of economic and political ideas, including socialism and communism.

memory of the Father of his country a monument begun but of course never completed calls forth some strokes of bitter but not unjust humor The means by which preferment is obtained in Washington are amply satirized There are two views of this book favorable and unfavorable This essay considers both For instance while some critics think that it is incoherent others suggests that the narrative departs from the traditional methods of concluding and is thereby more natural than most novels because every chapter of the book bears the marks of both writers and is therefore a novelty in its way In this essay I argue that The Gilded Age is essentially a satire and should always be accepted as such Of course other good contemporary books did not make it to our time in terms of popularity and legacy The Gilded Age did We talk write and read about it to this day Evidently it is an integral part of the annals of American literature and fully contributes to Mark Twain s reputation legacy and lasting influence **The Fusion of Economic Geography and World History** Lben Howard,1942
