Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrops rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Collection Evaluation in Academic Libraries Karen C. Kohn,2015-06-24 Librarians have long used data to describe their collections Traditional measures have simply been inputs and outputs volumes acquired processed owned or circulated With the growth since the 1990s of cultures of assessment librarians have sought statistics that are evaluative rather than

simply descriptive More recently exponentially increasing journal prices and an economic recession have intensified the need to make careful purchasing decisions and to justify these to administrators A methodical evaluation of a library collection can help librarians understand and meet user needs and can help communicate to administrators that the library is a good use of the institution's money Collection Evaluation in Academic Libraries A Practical Guide for Librarians equips collections managers to select and implement a method or several methods of evaluating their library collections It includes sections on four tools for evaluation Comparison to peer institutions Core lists Usage statistics from circulation and ILL Citation analysis Chapters on each of these approaches present the advantages and disadvantages of each method instructions on data collection and analysis with screenshots and suggested action steps after completing the analysis With a unique combination of step by step instructions and discussions of the purpose and role of data this book provides an unusually thorough guide to collection evaluation It will be indispensable for collection development librarians and anyone looking to strengthen the culture of assessment within the library
