## **Fairness And Futurity Essays On Environmental Sustainability And Social Justice:**

**Fairness and Futurity** Andrew Dobson, 1999      *Fairness and Futurity* Andrew Dobson, 1999-04-01 Fairness and Futurity Essays on Environmental Sustainability and Social Justice brings together leading international figures in political theory and sociology as well as representatives from the political community to consider the normative issues at stake in the relationship between environmental sustainability and social justice It raises important questions and sets out to provide the answers If future generations are owed justice what should we bequeath them Is sustainability an appropriate medium for environmentalists to express their demands Is environmental protection compatible with intra generational justice Is environmental sustainability a luxury when social peace has broken down These essays emerged from three intensive seminars that involved participants in constant re evaluations of their work and which brought three distinct groups environmental theorists mainstream political theorists and policy community members into fruitful contact In particular the attempt to involve mainstream theorists in environmental questions and to encourage environmentalists to use intellectual resources of political theory should be highlighted      **Fairness and Futurity** Andrew Dobson, Professor of Politics Andrew Dobson, 1999 Fairness and Futurity Essays on Environmental Sustainability and Social Justice brings together leading international figures in political theory and sociology as well as representatives from the political community to consider the normative issues at stake in the relationship between environmental sustainability and social justice It raises important questions and sets out to provide the answers If future generations are owed justice what should we bequeath them Is sustainability an appropriate medium for environmentalists to express their demands Is environmental protection compatible with intra generational justice Is environmental sustainability a luxury when social peace has broken down These essays emerged from three intensive seminars that involved participants in constant re evaluations of their work and which brought three distinct groups environmental theorists mainstream political theorists and policy community members into fruitful contact In particular the attempt to involve mainstream theorists in environmental questions and to encourage environmentalists to use intellectual resources of political theory should be highlighted      **Human Rights and Environmental Sustainability** Kerri Woods, 2010-01-01 Human Rights and Environmental Sustainability challenges the assumed harmony between human rights norms and the demands of environmental sustainability by addressing conceptual normative and political questions surrounding the interaction between the two What is gained and lost by environmental theorists and activists adopting the language and institutions of human rights Is there coherence or tension between the values of human rights and environmental sustainability Is the idea of environmental human rights plausible and defensible Whereas previous studies have considered the interface between human rights and environmental sustainability on an empirical level this pioneering book engages the theoretical and philosophical issues at stake Given the significant environmental challenges we face and the dominance of human rights as a normative framework these concerns demand our

attention This timely work will appeal to scholars in the fields of environmental politics philosophy human rights theory and global or international ethics as well as postgraduate students in environmental politics and philosophy Postgraduate students in human rights particularly human rights theory global or international ethics and scholars working in environmental law or human rights law will also find this book invaluable **Justice Unbound** Patrizia Longo, 2018-12-17 This important anthology provides students and teachers with voices of social and global justice that have been marginalized or forgotten by history It gives thought leaders from the Global South a platform and engages the voices of oppressed communities including Charles Mills and Franz Fanon and Ella Baker This text is a comprehensive analysis of modern and contemporary theories of justice Since the publication in 1971 of John Rawls's *A Theory of Justice* there has been much debate on his views from both the right and the left of the political spectrum But there is a lack of textbooks that provide not only a compilation of substantial selections on challenges to Rawls's theory from feminist and postcolonial scholars but that also include writings by non white and non Western authors on different aspects of justice This book fills this huge gap and brings together many influential writings on the topic of justice that are often omitted in philosophy and political theory collections This work addresses complex issues in an increasingly diverse society *Principles of Social Justice* David Miller, 2001-09-30 Social justice has been the animating ideal of democratic governments throughout the twentieth century Even those who oppose it recognize its potency Yet the meaning of social justice remains obscure and existing theories put forward by political philosophers to explain it have failed to capture the way people in general think about issues of social justice This book develops a new theory David Miller argues that principles of justice must be understood contextually with each principle finding its natural home in a different form of human association Because modern societies are complex the theory of justice must be complex too The three primary components in Miller's scheme are the principles of desert need and equality The book uses empirical research to demonstrate the central role played by these principles in popular conceptions of justice It then offers a close analysis of each concept defending principles of desert and need against a range of critical attacks and exploring instances when justice requires equal distribution and when it does not Finally it argues that social justice understood in this way remains a viable political ideal even in a world characterized by economic globalization and political multiculturalism Accessibly written and drawing upon the resources of both political philosophy and the social sciences this book will appeal to readers with interest in public policy as well as to students of politics philosophy and sociology [The Routledge Companion to Environmental Planning](#) Simin Davoudi, Richard Cowell, Iain White, Hilda Blanco, 2019-07-31 This Companion presents a distinctive approach to environmental planning by situating the debate in its social cultural political and institutional context being attentive to depth and breadth of discussions providing up to date accounts of the contemporary practices in environmental planning and their changes over time adopting multiple theoretical and analytical lenses and different disciplinary approaches and drawing on knowledge and expertise of a wide range of

leading international scholars from across the social science disciplines and beyond It aims to provide critical reviews of the state of the art theoretical and practical approaches as well as empirical knowledge and understandings of environmental planning encourage dialogue across disciplines and national policy contexts about a wide range of environmental planning themes and engage with and reflect on politics policies practices and decision making tools in environmental planning The Companion provides a deeper understanding of the interdependencies between the themes in the four parts of the book Understanding the environment Environmental governance Critical environmental pressures and responses and Methods and approaches to environmental planning and its 37 chapters It presents critical perspectives on the role of meanings values governance approaches and participations in environmental planning Situating environmental planning debates in the wider ecological political ethical institutional social and cultural debates it aims to shine light on some of the critical journeys that we have traversed and those that we are yet to navigate and their implications for environmental planning research and practice The Companion provides a reference point mapping out the terrain of environmental planning in an international and multidisciplinary context The depth and breadth of discussions by leading international scholars make it relevant to and useful for those who are curious about wish to learn more want to make sense of and care for the environment within the field of environmental planning and beyond

Moral and Political Reasoning in Environmental Practice Andrew Light, Avner De-Shalit, 2003 Essays showing how environmental philosophy can have an impact on the world by integrating abstract reasoning with actual environmental practice

**Sustainability: Sustainable development** Michael Redclift, 2005 Introducing the reader to sustainability as a concept a contested idea and a political goal this book brings together a range of articles and published papers that have influenced the course of thinking in social science It examines the links between the natural and social sciences as well as the public policies

**Critical Environmental Politics** Carl Death, 2013-12-04 The aim of this book is to review central concepts in the study of environmental politics and to open up new questions problems and research agendas in the field The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism and spanning disciplines including international relations geography sociology history philosophy anthropology and political science The 28 chapters cover a range of global and local studies illustrations and cases These range from the Cochabamba conference in Bolivia to climate camps in the UK UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands forests in Indonesia to Dutch energy governance reform indigenous communities in Namibia to oil extraction in the Niger Delta survivalist militias in the USA to Maasai tribesmen in Kenya Rather than following a regional or issue based e g water forests pollution etc structure the volume is organised in terms of key concepts in the field including those which have been central to the social sciences for a long time such as citizenship commodification consumption feminism justice movements science security the state summits and technology those which have been at the heart of environmental politics for many years including biodiversity climate change conservation eco

centrism limits localism resources sacrifice and sustainability and many which have been introduced to these literatures and debates more recently biopolitics governance governmentality hybridity posthumanism risk and vulnerability Features and benefits of the book Explains the most important concepts and theories in environmental politics Reviews the core ideas behind crucial debates in environmental politics Highlights the key thinkers both classic and contemporary for studying environmental politics Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics Each chapter is written by leading international authors in their field This exciting new volume will be essential textbook reading for all students of environmental politics as well as provocatively presenting the field in a different light for more established researchers      *Global Crisis, Local Voices* Gabriele Piazza, Megan Jessie Asplin ,Kajsa Hallberg, 2019-04-01 In an interconnected and globalized world the voices of the local communities struggle to make themselves heard on the international stage But many issues that arise within international relations have consequences for ordinary lives and are therefore closely connected Climate change warfare and migration are all examples of this They are often discussed in abstract terms with relation to international diplomacy but threaten the actual livelihoods of small communities and ordinary people This was the setting of the conference Global Crisis Local Voices held in May 2018 This journal is a compilation of the papers presented at that conference which was the second DEN International Student Conference The conference and this publication is one of the many projects that the Democratic Education Network DEN is responsible for since its launch in 2016 This book is a collection of diverse works all written by student authors from a range of different universities From Democracy and Ideology to Climate Change and China it covers numerous concepts ideas and geographical regions that are often found in the studies of Politics and International Relations This book is the result of passion and hard work from all students involved in its production and it is a project that we in DEN are incredibly proud of and hope to continue in the future I encourage you to read these publications to catalyse views in you that stimulate great debate that helps you become part of the compassionate progressive and responsible movement of young people that will help overcome injustices in the world and make the world a better place Dr Peter Bonfield OBE FEng Vice Chancellor and President University of Westminster      *Shipbreaking in Developing Countries* Md Saiful Karim, 2017-12-06 This book explores the process of shipbreaking in developing countries with a particular focus on Bangladesh In the past shipbreaking the disposal of obsolete ships was a very common industrial activity in many developed countries However due to stringent domestic environmental and labour laws it is almost impossible for the increasing number of vessels to be disposed of domestically and now developing nations including Bangladesh China India Turkey and Pakistan regularly participate in this activity The shipbreaking yards in these countries are not only detrimental to the marine and coastal environment but also represent significant health hazards to local people and workers Given the global importance of the issue an effective legal and institutional framework for a sustainable operation of the shipbreaking industry is desperately

needed Sitting at the intersection of three distinct fields environmental justice international environmental law and international maritime law this book offers an innovative take on the issues surrounding the shipbreaking process Drawing on the case study of Bangladesh due to its prominence in the shipbreaking industry the author implements an environmental justice framework to examine the issues of sustainability surrounding shipbreaking and analyses the relationship between social development economic development and environmental protection Maritime perspectives of environmental justice will also be highlighted through a discussion of the International Maritime Organization s role in the implementation of the Hong Kong Convention in developing countries This book will be of great interest to scholars of environmental justice international maritime law and international environmental law

**Political Theory In Transition** Noel O'Sullivan,2013-07-04 During the past two decades there has been increasing dissatisfaction with established political categories on the grounds that they no longer fit many of the facts of contemporary life or adequately express many contemporary political ideals Political Theory in Transition explores the principal reasons for this dissatisfaction and outlines some of the most influential responses to it Key features of this textbook covers many of the important areas in political theory including Communitarianism Identity Feminism Liberalism Citizenship Democracy Power Authority Legitimacy Nationalism Globalization and the Environment includes chapters written by some of the foremost authorities in the field of political theory divided into four useful sections beginning with the concept of the individual and progressing to beyond the nation state

**The Politics of Actually Existing Unsustainability** John Barry,2012-02-23 At the level of developing a progressive and critical theoretical understanding of unsustainability it argues for the importance of integrating vulnerability which has been largely neglected by both mainstream western political theory and analyses of the current global ecological crisis It suggests that valuable insights into the causes of and alternatives to unsustainability can be found in a critical embracing of human vulnerability and dependency as both constitutive and ineliminable aspects of what it means to be human Rather than seeing invulnerability as the appropriate response the book defends resilience and the ability to cope with rather than solve vulnerability as more productive

**The Oxford Handbook of Political Theory** John S. Dryzek,Bonnie Honig,Anne Phillips,2006 Oxford Handbooks of Political Science are the essential guide to the state of political science today With engaging contributions from 51 major international scholars the Oxford Handbook of Political Theory provides the key point of reference for anyone working in political theory and beyond

Sustainable Communities and the Challenge of Environmental Justice Julian Agyeman,2005-08-01 Argues that environmental justice and the sustainable communities movement are compatible Popularized in the movies Erin Brockovich and A Civil Action environmental justice refers to any local response to a threat against community health In this book Julian Agyeman argues that environmental justice and the sustainable communities movement are compatible in practical ways Yet sustainability which focuses on meeting our needs today while not compromising the ability of our successors to meet their needs has not always partnered with the challenges

of environmental justice Sustainable Communities and the Challenge of Environmental Justice explores the ideological differences between these two groups and shows how they can work together Agyeman provides concrete examples of potential model organizations that employ the types of strategies he advocates This book is vital to the efforts of community organizers policymakers and everyone interested in a better environment and community health *Deliberative Democracy for the Future* Genevieve Fuji Johnson,2008-01-01 The theory of deliberative democracy promotes the creation of systems of governance in which citizens actively exchange ideas engage in debate and create laws that are responsive to their interests and aspirations While deliberative processes are being adopted in an increasing number of cases decision making power remains mostly in the hands of traditional elites In Democratic Illusion Genevieve Fuji Johnson examines four representative examples participatory budgeting in the Toronto Community Housing Corporation Deliberative Polling by Nova Scotia Power Incorporated a national consultation process by the Canadian Nuclear Waste Management Organization and public consultations embedded in the development of official languages policies in Nunavut In each case measures that appeared to empower the public failed to challenge the status quo approach to either formulating or implementing policy Illuminating a critical gap between deliberative democratic theory and its applications this timely and important study shows what needs to be done to ensure deliberative processes offer more than the illusion of democracy *Environmental Values in a Globalizing World* Ian Lowe,Jouni Paavola,2004-08-02 This volume brings together contributions from prominent philosophers political scientists and other scholars on the challenges that globalization poses to traditional environmental values **Engaging Appalachia** Rebecca Adkins Fletcher,Rebecca-Eli Long,William Schumann,2023-03-07 Inclusive campus community collaborations provide critical opportunities to build community capacity defined as a community s ability to jointly respond to challenges and opportunities and sustainability Through case studies from across all three subregions of Appalachia from Georgia to Pennsylvania Engaging Appalachia A Guidebook for Building Capacity and Sustainability offers diverse perspectives and guidance for promoting social change through campus community relationships from faculty community members and student contributors This volume explores strategies for creating more inclusive and sustainable partnerships through the arts humanities social sciences and natural sciences In representing diverse areas environments and issues three relatable themes emerge within a practice viewpoint that is scalable to communities beyond Appalachia fostering student leadership asset building and needs fulfillment within community engagement Engaging Appalachia presents collaborative approaches to regional community engagement and offers important lessons in place based methods for achieving sustainable and just development Written with practicality in mind this guidebook embraces hard earned experiences from decades of work in Appalachia and sets forth new models for building community resilience in a changing world Environmental Discourses in Public and International Law Brad Jessup,Kim Rubenstein,2012-02-02 How do dominant views and arguments about environmental problems traverse and connect international and public law
