Eating Free works because it's a scientific solution which targets a complete set of lifestyle factors not just calories and exercise. What's more, Eating Free will show you why a little known hormone ghrelin can wreak havoc on your waistline and sabotage your efforts and why almost everything you think you know about weight loss is wrong.

Myth 1 Exercise Is Critical for Success Over 70% of Americans hate the gym or don't have time to go and according to the Canadian Community Health Service almost half of Canadians over the age of 12 are considered inactive or don't exercise regularly. Guess what? You don't need to spend hours at the gym. Eating Free proves that weight loss is 80% nutrition and only 20% exercise. You'll learn how to shop, not sweat your way to being lean and focus on preparing delicious food instead of exercising excessively.

Myth 2 You Need to Cut Down on Carbs With Villacorta's formula for optimal weight loss 45% carbohydrate, 30% protein and 25% fat you will satiate your appetite by controlling the hunger hormone ghrelin and prevent muscle breakdown.

Myth 3 You Need to Track Your Progress Daily Instead of obsessing over what the scale reads each morning you'll learn why it's more effective to gauge your body's needs in weekly increments. With a free online tool The Free Q you can score every lifestyle element that impacts your weight loss including lots of stress and little sleep. This tool helps you live wisely for weight loss each week. No other program demonstrates how these elements play a critical role in weight loss with a free practical tool.

The Bariatric Bible Carol Bowen Ball, 2019-07-19 After Carol Bowen Ball underwent bariatric surgery she found there was very little practical information for weight loss surgery patients and as a result she wrote the first and to date only UK bariatric advice and cookery book *Return to Slender*. At the same time she launched *BariatricCookery.com* a website to support the same patients. A year later she wrote a sequel *Return 2 Slender Second Helpings*. Both books have been widely praised by the professional bariatric community as well as pre-op and post-op patients. The recipes in *The Bariatric Bible* are designed and developed to help at every stage after weight loss surgery. They are colour coded to suit the 3 main stages afterwards. These are the Red or 1st Fluids Stage, the Amber or 2nd Soft Purged Stage, the Green or 3rd Eating for Life Stage. They will have a nutritional analysis breakdown. This includes measured calories, protein, carbohydrate and fat levels. Recipes are also further coded for suitability for freezing and for vegetarian eating. A new bariatric lifestyle however isn't just about food, it is also about exercise, changes in behaviour and relationships, adhering to essential medications, coping with unsettling situations that can derail the best of intentions, dealing with social situations like eating out, finding new ideas for a changing body through fashion and beauty advice and making new healthier habits to replace old destructive ones. As a result the book will be the most comprehensive book of any currently on the market. It also covers the types of surgery on offer and highlights the many diets that are required prior to surgery, sometimes to lose weight as part of the qualification process. However its main focus is on advice and recipes for after surgery to help the post-op patient maximise their best chance of long term success with weight loss and better health.
