Spooky Technology: A reflection on the invisible and otherworldly qualities in everyday technologies Daragh Byrne, Dan Lockton, Matthew Cruz, Christi Danner, Karen Escarcha, Katherine Giesa, Meijie Hu, Yiwei Huang, Miranda Luong, Anuprita Ranade, Gordon Robertson, Elizabeth Wang, Lisa (Yip Yan) Yeung, Catherine Yochum, 2021-08-31 Spooky Technology explores our understanding of the invisible technologies in our everyday lives from objects with intelligence to systems in our homes that talk to us and each other The book is an inventory of spooky technologies compiled by Carnegie Mellon students reviewing work across art design HCI psychology human factors research and other fields that has been done in this field or adjacent to it both historically and more recently with commentary essays and interviews with creators and artists We often hear that the technologies in our everyday lives would appear to be magic and potentially terrifying to people in the past instantaneous communication with people all over the world access to a vast ever growing resource of human knowledge right there in the palm of our hand objects with intelligence that can sense and talk to us and each other But rarely are these otherworldly dimensions of technologies explored in more detail There is an often unspoken presumption that the march of progress will inevitably mean we all adopt new practices and incorporate new products and new ways of doing things into our lives all cities will become smart cities all homes will become smart homes But these systems have become omnipresent without our necessarily understanding them They are not just black boxes but invisible entities in our homes and everyday lives which work through hidden flows of data unknown agendas imaginary clouds mysterious sets of rules which we perhaps dismiss as algorithms or even AI without really understanding what that means On some level the superstitions and sense of wonder and ways of relating to the unknown and the supernatural deities spirits ghosts which humanity has felt in every culture throughout history have not gone away but started to become transferred and transmuted into new forms

The Best of Times, The Worst of Times Michael Burleigh, 2017-11-02 In the decades since the end of the Second World War it has been widely assumed that the western model of liberal democracy and free trade is the way the world should be governed However events in the early years of the twenty first century first the 2003 war with Iraq and its chaotic aftermath and second the financial crash of 2008 have threatened the general acceptance that continued progress under the benign or sometimes not so benign gaze of the western powers is the only way forwards And as America turns inwards and Europe is

John William Cunliffe, Gerhard Richard Lomer, 1920 Autism, Bullying and Me Emily Lovegrove, 2020-05-21 It's not always easy to stand out from the crowd especially if you're a teenager There's a lot of information out there on how to deal with bullying but a lot of it is contradictory or seems like it won't work But this guidebook is different Helping you sort fact from fiction the book looks at the different forms bullying can take and debunks commonly held myths such as bullying makes you stronger and ignore it and it will stop You'll learn techniques to clear your mind so that you can respond to bullying situations calmly and confidently and be positive about who you are Finally it's packed with self-empowering strategies for coping with being autistic in a neurotypical world and practical tips so you can handle any bullying scenario *The Rise of the Curator Class* Steffon Davis, 2019-03-14 Pairing big ideas in marketing with the popular activity of content curation The Rise of the Curator Class positions curation as a humanization movement that is restructuring the internet Curation is set to overturn the 2.2 trillion global creative industry revolutionizing how we create market and discover content In the era of content overload and fake news in which everything to buy listen to read or watch is available online there is one group of people who have learned to thrive in this climate of superabundance the curator class whose influence and power grows as more people look to them as guides This new curator class is rewriting traditional curation tackling the overload and making sense of it for others In the past curation was available to an elite few Now internet platforms such as Pinterest Spotify and Twitter empower hundreds of millions of people to curate their ideas for anyone who may be interested revolutionizing how content is marketed and sold The Rise of the Curator Class explains how curation is disrupting internet commerce as consumer trust moves farther away from traditional brands and closer to the curators who lead tastes and it equips readers to think critically about how curation can work for them **South Africa's Dreams** Robert J. Gordon, 2021-02-05 In the

early sixties South Africa's colonial policies in Namibia served as a testing ground for many key features of its repressive Grand Apartheid infrastructure including strategies for countering anti-apartheid resistance Exposing the role that anthropologists played this book analyses how the knowledge used to justify and implement apartheid was created Understanding these practices and the ways in which South Africa's experiences in Namibia influenced later policy at home is also critically evaluated as is the matter of adjudicating the many South African anthropologists who supported the regime

The Worst Is Yet to Come Peter Fleming, 2019-01-15 Capitalism is about to commit suicide and is threatening to take

us down with it But will it give way to a grand social utopia or the beginning of a new dark age albeit WiFi enabled The Worst is Yet to Come explores the disturbing possibility that the current crisis of neoliberal capitalism isn't going to spawn an emancipatory renaissance but a world that is much much worse Wealthy CEOs see it They've been purchasing isolated bunker retreats in New Zealand for when the shit goes down Our politicians know it too and are frantically transforming the liberal state into a militarized machine Scientists are either uselessly decrying the looming eco catastrophe or jumping on the opportunity to conduct ever reckless experiments with the human genome The animal kingdom is retreating from the scene in terrible silence preferring the swift demise of the abattoir's bolt gun than witnessing what is about to happen Yet some of us are still ignoring the warning signs choosing instead to remain cheerfully optimistic believing that society has probably hit rock bottom and the only way is up This book argues the opposite What if we haven't hit rock bottom and are on the precipice of something much worse And what if we're too late But this grim prospect isn't submitted in the name of millennial fatalism or hopeless resignation On the contrary if our grandchildren are to survive the implosion of capitalism for the chances we will are fairly slim then a realistic picture of the nightmare to come is crucial Only an unwavering attitude of revolutionary pessimism will help us to prepare accordingly For the apocalypse will almost certainly be disappointing

Drums In The Distance Joe Mulhall, 2021-07-08 Mulhall watches the extreme right revival from the inside as an anti fascist infiltrator criss crossing the global networks of modern fascism but he brings a deep analytical focus By the end of it we understand one thing the threat of a second fascist era is real Paul Mason author of Postcapitalism An urgent missive from the global frontlines of the fight against fascism Nima Elbagir CNN Senior International Correspondent A terrifying and timely look at the spread of far right movements across the globe Joe Mulhall knows what it's like to stare fascism in the face For a decade often undercover at significant personal risk he has investigated hate groups He infiltrated a US white supremacist militia set up a fake Ku Klux Klan branch has been on countless street marches with violent far right groups across Europe and got inside some of the most important alt right meetings ever held Brazil India and the US are still in thrall to authoritarian populism and far right views have become steadily normalised in mainstream politics Mulhall's dramatic experiences on the front line of anti fascist activism coupled with his academic research clearly explain the roots of both elected and non elected far right movements across the globe Above all he concludes the far right should not be dehumanised they are normal people but with dangerous beliefs that can be defeated Joe has had a unique view of the far right over the past decade as it transformed from a marginal subculture into one of the defining political currents of our time He understands how these groups think and operate and is perfectly placed to guide readers through this disturbing but vital story Daniel Trilling journalist and author of Lights In The Distance Exile and Refuge at the Borders of Europe Few if any are better placed to write a book of this breadth and scale than Joe Mulhall Mark Townsend Home Affairs editor of the Observer
