

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Resolving Structural Conflicts

Richard E. Rubenstein, 2017-01-06 This book analyses how certain types of social systems generate violent conflict and discusses how these systems can be transformed in order to create the conditions for positive peace Resolving Structural Conflicts addresses a key issue in the field of conflict studies what to do about violent conflicts that are not the results of misunderstanding prejudice or malice but the products of a social system that generates violent conflict as part of its normal operations This question poses enormous challenges to those interested in conflict resolution since the solution to this problem involves restructuring social political and cultural systems rather than just calling in a mediator to help people arrive at an agreement This study breaks new ground in showing how local conflicts involving crime police and prisons transnational conflicts involving religious terrorism by groups like ISIS and international conflicts involving Great Power clashes are all produced in large part by elite driven exploitative or oppressive social structures It also presents new ideas about the implications of this structural turn for the practice of conflict resolution emphasizing the need for conflict resolvers to embrace a new politics and to broaden their methods far beyond traditional forms of facilitation Written by a leading scholar this book will be of much interest to students of conflict resolution peace studies war and conflict studies sociology political science and international relations in general

Urban Ills

Carol Camp Yeakey, Vetta L. Sanders Thompson, Anjanette Wells, 2013-12-13 Urban Ills Twenty First Century Complexities of Urban Living in Global Contexts is a collection of original research focused on critical challenges and dilemmas to living in cities Volume 2 is devoted to the myriad issues involving urban health and the dynamics of urban communities and their neighborhoods The editors define the ecology of urban living as the relationship and adjustment of humans to a highly dense diverse and complex environment This approach examines the nexus between the distribution of human groups with reference to material resources and the consequential social political economic and cultural patterns which evolve as a result

of the sufficiency or insufficiency of those material resources They emphasize the most vulnerable populations suffering during and after the recession in the United States and around the world and the chapters examine traditional issues of housing and employment with respect to these communities

Covert Regime Change Lindsey A. O'Rourke, 2018-12-15 O'Rourke's book offers a onestop shop for understanding foreign imposed regime change Covert Regime Change is an impressive book and required reading for anyone interested in understanding hidden power in world politics Political Science Quarterly States seldom resort to war to overthrow their adversaries They are more likely to attempt to covertly change the opposing regime by assassinating a foreign leader sponsoring a coup d'etat meddling in a democratic election or secretly aiding foreign dissident groups In Covert Regime Change Lindsey A O'Rourke shows us how states really act when trying to overthrow another state She argues that conventional focus on overt cases misses the basic causes of regime change O'Rourke provides substantive evidence of types of security interests that drive states to intervene Offensive operations aim to overthrow a current military rival or break up a rival alliance Preventive operations seek to stop a state from taking certain actions such as joining a rival alliance that may make them a future security threat Hegemonic operations try to maintain a hierarchical relationship between the intervening state and the target government Despite the prevalence of covert attempts at regime change most operations fail to remain covert and spark blowback in unanticipated ways Covert Regime Change assembles an original dataset of all American regime change operations during the Cold War This fund of information shows the United States was ten times more likely to try covert rather than overt regime change during the Cold War Her dataset allows O'Rourke to address three foundational questions What motivates states to attempt foreign regime change Why do states prefer to conduct these operations covertly rather than overtly How successful are such missions in achieving their foreign policy goals

Beyond the Skills Gap Matthew T. Hora, 2019-01-02 2018 Frederic W. Ness Book Award AACU How can educators ensure that young people who attain a postsecondary credential are adequately prepared for the future Matthew T. Hora and his colleagues explain that the answer is not simply that students need more specialized technical training to meet narrowly defined employment opportunities Beyond the Skills Gap challenges this conception of the skills gap highlighting instead the value of broader twenty first century skills in postsecondary education They advocate for a system in which employers share

responsibility along with the education sector to serve the collective needs of the economy society and students Drawing on interviews with educators in two and four year institutions and employers in the manufacturing and biotechnology sectors the authors demonstrate the critical importance of habits of mind such as problem solving teamwork and communication They go on to show how faculty and program administrators can create active learning experiences that develop students skills across a range of domains The book includes in depth descriptions of eight educators whose classrooms exemplify the effort to blend technical learning with the cultivation of twenty first century habits of mind The study set in Wisconsin takes place against the backdrop of heated political debates over the role of public higher education This thoughtful and nuanced account enriched by keen observations of postsecondary instructional practice promises to contribute new insights to the rich literature on workforce development and to provide valuable guidance for postsecondary faculty and administrators
