Convex Optimization Stephen P. Boyd,Lieven Vandenberghe,2004-03-08 Convex optimization problems arise frequently in many different fields This book provides a comprehensive introduction to the subject and shows in detail how such problems can be solved numerically with great efficiency The book begins with the basic elements of convex sets and functions and then describes various classes of convex optimization problems Duality and approximation techniques are then covered as are statistical estimation techniques Various geometrical problems are then presented and there is detailed discussion of unconstrained and constrained minimization problems and interior point methods The focus of the book is on recognizing convex optimization problems and then finding the most appropriate technique for solving them It contains many worked examples and homework exercises and will appeal to students researchers and practitioners in fields such as engineering computer science mathematics statistics finance and economics

Computational Techniques for Text Summarization based on Cognitive Intelligence V. Priya,K. Umamaheswari,2023-03-17 The book is concerned with contemporary methodologies used for automatic text summarization It proposes interesting approaches to solve well known problems on text summarization using computational intelligence CI techniques including cognitive approaches A better understanding of the cognitive basis of the summarization task is still an open research issue an extent of its use in text summarization is highlighted for further exploration With the ever growing text people in research have little time to spare for extensive reading where summarized information helps for a better understanding of the context at a shorter time This book helps students and researchers to automatically summarize the text documents in an efficient and effective way The computational approaches and the research techniques presented guides to achieve text summarization at ease The summarized text generated supports readers to learn the context or the domain at a quicker pace The book is presented with reasonable amount of illustrations and examples convenient for the readers to understand and implement for their use It is not to make readers understand what text summarization is but for people to perform text summarization using various approaches This also describes measures that can help to evaluate determine and explore the best possibilities for text summarization to analyse and use for any specific purpose The illustration is based on social media and healthcare domain which shows the possibilities to work with any domain for summarization The new approach for text summarization based on cognitive intelligence is presented for further exploration in the field
