

Introduction to InDesign CS3

Desktop Publishing is the process of combining text and graphics on a computer screen to produce publications. It is used to produce newsletters, greeting cards, restaurant menus, advertisements, pamphlets, books or catalogues and you will produce these types of publications as you progress through these tutorials.

Programs such as Microsoft Word are useful programs when simple Desktop Publishing activities are required; however, when detailed publishing is desired, a specific page layout program is needed. The program you will use for this is called Adobe InDesign CS3 and it gives you total control over the appearance of pages. You will still use programs like Microsoft Word and graphics programs such as PhotoShop, but as support programs to the page layout program.

Starting an InDesign Document

1. Load Adobe InDesign and you should receive the InDesign Start Screen, which has the four labelled sections shown.
