- ❑ We are now using Liferay v5.2 unifies the configuration of the database in a single file for all application servers. As most other configuration options you can set this up in the portal - ext.properties file as follows (example for MySQL):

```
jdbc.default.driverClassName=com.mysql.jdbc.Driver      jdbc.default.url=jdbc:mysql://localhost/portal?
useUnicode=true&characterEncoding=UTF-8&useFastDateParsing=false
jdbc.default.username=
jdbc.default.password=
```

If you don't have existing portal-ext.pro... file then manually create it and save it to - (liferay-home)\{tomcat}\webapps\ROOT\WEB-INF\classes

Now you have to make sure that you have already created database like this - create database (portal character set utf8)

- ❑ If you want configure extra setting then read full administration pdf from liferay.com and install appropriate libraries
