- Use the law of reflection and the embedded protractor in order to draw the reflected ray associated with the given incident ray for the following plane mirror situations. (Markings are provided at 15° increments.)

- Now for a research question:

In this unit we will often discuss how the reflection of light from a mirror results in the formation of an image. The term image as used here has an obvious context - physics. But the term image has numerous other contexts - psychology (a positive self-image), religion (created in God's image), business (the company's image), medicine (an x-ray image), etc. Your research question involves finding a dictionary and looking up the definition of the word image.
