The Entrepreneurial Paradox Lianne Taylor, 2016-11-29 Exploring the interaction between entrepreneurs and managers, this book attempts to understand the psychology behind how they think, behave, and interact in order to benefit organizations. The Entrepreneurial Paradox shows how to achieve sustainable success and resilience through teamwork. In examining the collective mind, the author asserts that understanding these relationships can secure the right changes within a business through the integration and transfer of entrepreneurial experience and new managerial approaches. Presenting original research, the author reveals new insights into the challenges in such interactions, addresses what causes them, and provides a guide for avoiding conflict.

Habitual Entrepreneurs Deniz Ucbasaran, Paul Westhead, Mike Wright, 2006-01-01 This is an excellent book. The conceptual framework and empirical results are presented in a most readable form. The reader is also provided with a comprehensive discussion of the results obtained. The book contains a wealth of information about entrepreneurs and entrepreneurship and provides numerous suggestions for future research. Economic Outlook and Business Review. Despite a number of success stories presented in the media, not all habitual entrepreneurs are successful. Entrepreneurs who have owned at least two businesses are consistently successful. This book is inspired by the apparent dearth of rigorous research to underpin or, in some cases, challenge the popular perception of habitual entrepreneurs. It seeks to address the gap in the literature by shedding light on the phenomenon of habitual entrepreneurship. Deniz Ucbasaran, Paul Westhead, and Mike Wright use a combination of theory and empirical evidence to illustrate why it is so important for researchers, policymakers, entrepreneurs, and investors to distinguish between novice, i.e., first-time entrepreneurs and habitual entrepreneurs. Issues tackled include human capital, characteristics, information search,

and opportunity identification behaviours and the performance of different types of entrepreneurs The book also highlights the heterogeneity of habitual entrepreneurs by drawing attention to serial and portfolio entrepreneurs Developing a conceptual framework and an agenda for future research Habitual Entrepreneurs will prove a significant reference tool for academics students and researchers with an interest in entrepreneurship and SMEs Its systematic analysis of the role of prior entrepreneurial experience in the venturing process will also be invaluable to practitioners such as policymakers entrepreneurs and investors Data-Driven Decision Making in Entrepreneurship Nikki Blacksmith, Maureen E.

McCusker, 2024-04-02 Since the beginning of the 21st century there has been an explosion in startup organizations Together these organizations have been valued at over 3 trillion In 2019 alone nearly 300 billion of venture capital was invested globally Global Startup Ecosystem Report 2020 Simultaneously an explosion in high volume and high velocity of big data is rapidly changing how organizations function Gone are the days when organizations can make decisions solely on intuition logic or experience Some have gone as far as to say that data is the most valuable currency and resource available to businesses and startups are no exception However startups do differ from their larger counterparts and corporations in three distinct ways 1 they tend to have fewer resources time and specialized training to devote to data analytics 2 they are part of a unique entrepreneurial ecosystem with unique needs 3 scholarship and academic research on human capital data analytics in startups is lacking Existing entrepreneurship research is primarily conducted in business schools There needs to be more integration of industrial organizational psychology and entrepreneurship This book was designed to do just that to demonstrate how organizational psychology with a focus on human capital data and analytics can advance the science and practice of entrepreneurship This book is purposefully designed to address the unique idiosyncrasies of the science research and practice of startups and the entrepreneurial ecosystem Each chapter takes a science practice perspective highlighting a specific human capital management topic e g learning and development team effectiveness human capital due diligence and discusses how leveraging data can help enhance decision making The volume is grounded in sound theory and practice of organizational psychology entrepreneurship and management It is divided into three parts 1 human capital assessment and development for startups 2 understanding startup situations environments and support systems and 3 measuring startup level performance *Global Business Expansion: Concepts, Methodologies, Tools, and Applications* Management
