narratives about how AA students have understood their positions within the general education and special education systems. Therefore, with a pervasive lack of knowledge when it comes to understanding the experiences of AA with disabilities, this book describes personal experiences and challenges the idea that AA students with disabilities are substandard. While this book will emphasize successful narratives, it will also provide counter narratives to demystify the myth that those with disabilities cannot succeed or obtain terminal degrees. Overall, this edited book is a much needed contribution to the scholarly literature and may help teachers across a wide array of academic disciplines in meeting the academic and social needs of AA students with disabilities.

ENDORSEMENTS

Dr. Shawn Robinson's collection of personal narratives raises critical questions about the U.S. public education system. Written by African Americans compartmentalized in special education programs because of actual or perceived disabilities, these stories will impel readers, even tangentially affiliated with educational institutions, to consider testing, placement, mainstreaming, retention, and promotion, and other assessment policies that determine grade level readiness. Thanks to Robinson, the perspectives of these graduates who surmounted barriers to more positive and accommodating learning environments now receive proper attention.

John Pruitt, University of Wisconsin Rock County

With a bold vision, Dr. Shawn Anthony Robinson enters the discussion of Special Education with a collection of narratives that highlight the struggles and triumphs of marginalized students. In America, we have a long contested history of inclusion of students of color and difference in our public mainstream institutions. When these students are invited to the education table, they still must overcome persistent and pernicious barriers to true and equal educational opportunities. Consequently, students are left to sink or swim in oceans of disparity and inequity. This collection of narratives and counter narratives confronts the absence of adequate research and other empirical evidence of pedagogy and practice that would be essential to 21st Century progress in educational praxis. This volume represents one important step towards adding new voices to the continuing struggle of meaningful inclusion. How might students of color and difference succeed in an education system that provides no room to bloom? The authors address this challenge by exploring topics such as Aspirational Capital, Linguistic Capital, Familial Capital, Social Capital, Navigational Capital, and Resistance Capital. The reader will be exposed to ideas that will help students make a way out of no way by working both within and against educational systems full of barriers and opportunities. Congratulations to Dr. Robinson and his colleagues as the content of this volume represents an important contribution to the extant literature.
