

Endangered Species

The majestic tiger, a symbol of strength and beauty, is sadly an endangered species. Due to habitat loss and poaching, their population has drastically declined. Conservation efforts are crucial to protect these magnificent creatures and ensure their survival. Organizations around the world are working tirelessly to preserve their habitats and combat illegal wildlife trade.

1) What is the current status of tigers?

2) What are the main threats to their population?

3) What efforts are being made to protect them?

TIME For Kids Nonfiction Readers: Challenging Plus Teacher's Guide Chandra Prough, 2013-01-15 Learning and Teaching in the Chinese Classroom Shane N. Phillipson, Bick-har Lam, 2011-10-01 A major concern of all education authorities around the world is the challenge that schools face in catering for learner diversity That this concern is shared by authorities in East Asia including the Education Bureau EDB of Hong Kong is surprising given the high academic achievement of students from this part of the world This book helps to meet this challenge for teachers in East Asia by focusing on specific research that helps explain the basis for diversity in the Chinese learner Although there are many textbooks that cover the basic principles of educational psychology few do not focus on the Chinese learner This book makes the link between the broad field of educational psychology and how these theories contribute to our understanding of the Chinese learner This book is unique in that it draws on recent research to illustrate the application of these theories thereby helping teachers and students in teacher education programmes understand the variability in student achievement Our book is based on the idea that the Chinese context is in many ways different to other cultural contexts and that teachers can make a difference to the outcomes of student learning We also draw on our many years of experience in educating future teachers where our students want us to focus on the Chinese classroom Our student teachers also want to be educated by professors who are themselves researchers In drawing on research about the Chinese learner we also bring to our student teachers the richness and value of educational research We also encourage our student teachers to think of themselves as professional researchers in terms of developing an understanding of the research literature and in finding solutions to their classroom problems
