

CHAPTER 8

Accounting for Receivables

ANSWERS TO QUESTIONS

1. Accounts receivable are amounts owed by customers on account. They result from the sale of goods and services. Notes receivable represent claims that are evidenced by formal instruments of credit.
2. Other receivables include nontrade receivables such as interest receivable, loans to company officers, advances to employees, and income taxes refundable.
3.

Accounts Receivable _____	40	
Interest Revenue _____		40
4. The essential features of the allowance method of accounting for bad debts are:
 - (1) Uncollectible accounts receivable are estimated and matched against revenue in the same accounting period in which the revenue occurred.
 - (2) Estimated uncollectibles are debited to Bad Debt Expense and credited to Allowance for Doubtful Accounts through an adjusting entry at the end of each period.
 - (3) Actual uncollectibles are debited to Allowance for Doubtful Accounts and credited to Accounts Receivable at the time the specific account is written off.
5. Roger Holloway should realize that the decrease in cash realizable value occurs when estimated uncollectibles are recognized in an adjusting entry. The write-off of an uncollectible account reduces both accounts receivable and the allowance for doubtful accounts by the same amount. Thus, cash realizable value does not change.
6. TSMC reports Receivables from related parties and other receivables from related parties under Current Assets. It uses the allowance method to account for uncollectibles.
7. The adjusting entry is:

Bad Debt Expense _____	280,000	
Allowance for Doubtful Accounts (NT\$580,000 – NT\$300,000) _____		280,000
8. Under the direct write-off method, bad debt losses are not estimated and no allowance account is used. When an account is determined to be uncollectible, the loss is debited to Bad Debt Expense. The direct write-off method makes no attempt to match bad debts expense to sales revenues or to show the cash realizable value of the receivables in the statement of financial position.
9. Offering credit usually results in an increase in sales because customers prefer to "buy now and pay later". If a company decides to extend credit to customers, it should also establish credit standards to determine if a particular customer is credit worthy. Standards that are easily met can result in additional sales being made to customers that may not be able to meet the "tighter" credit policies of competitors. If such customers fail to pay, the additional sales revenue will be offset by higher collection costs and bad debt expense.
