XLS1000 Life Safety System

An advanced, networked life safety system designed for large single and multi-site applications

The XLS1000 is a networked life safety system featuring intelligent alarm detection and fast, reliable peer-to-peer communications. Expandable to more than eighty thousand points, it is well suited to large buildings such as hospitals, office towers, and hotels, as well as multi-building applications including universities, manufacturing complexes and military bases.

Setting a new standard for protection and performance

- **Powerful, flexible system architecture** - As building requirements grow, the system easily expands from a single stand-alone panel to a network linking 64 panels to a LAN network reaching every corner of a large building complex.
- **Peer communications** - The XLS1000 features a rapid and reliable peer-to-peer communications network using a multi-priority token passing protocol. Sophisticated data broadcast techniques and a distributed database ensure excellent response time.
- **Intelligent detectors** - The XLS1000 system features the Signature Series Detectors and modules, each incorporating its own microprocessor. Multi-sensor detectors incorporate various combinations of photoelectric, ionization and thermal sensors in a single unit providing unprecedented levels of protection and virtual elimination of nuisance alarms.
- **Integrated digital audio** - The audio evacuation system facilitates safe, orderly evacuation of the building as well as meeting other emergency signaling needs. The system generates eight channels of digitized audio messages simultaneously over a single pair of wires including live broadcast by microphone.
- **Simplified user interface** - Access to all network data is available at every panel. The Liquid Crystal Display (LCD) is a language-based, menu-driven operator interface which provides prioritized listings of all current alarms. Multiple language capability is also available for worldwide applications.
