*Air-Conditioning in Modern American Architecture, 1890-1970* Joseph M. Siry, 2021-02-01 Air Conditioning in Modern American Architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as

Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning's technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history

*Manufacturing Possibilities* Gary Herrigel, 2010-07-15 This alternative view consists of two distinctive claims **On Pyrrho and Time** Jean-Paul Martinon, 2024-09-28 Today's understanding of time remains mostly Aristotelian and Newtonian Einsteinian time is what has been abstracted from the mundane realities of life and reduced to its measurement Any somatic psychological or other experience of time is deemed either irrelevant or secondary The history of the attempts to provide alternatives to time as measurement is infinite most of which focuses on understanding time as an inner temporal phenomenon for which a subject temporalizes him or herself through remembrance experience or anticipation including death Amidst this vast field one argument by an enigmatic figure in ancient Greek thought stands out for the way it abides by neither the conventional view that time is clock time nor that it is an inner temporal phenomenon Aenesidemus overlooked way of apprehending time by qualifying it as similar to air To make sense of such an unusual statement it is necessary to reconsider what informs such an unusual idea Aenesidemus teacher was Pyrrho often dubbed the Greek Buddha who advocated for a non differential approach to reality one for which nothing is fixed or stable With this perspective in mind Aenesidemus idea then becomes clear time or air knows no differentiae whether that of the unit of measure or of the subject breathing it and sheltering from it Both are radically unstable While these ideas had no purchase for over 2000 years they can now be revealed in all their magnitude In the last 120 years we have indeed become aerial beings We no longer scuttle around on the ground floor below an unsuspected ocean of air We no longer aspire to shin a tree or scale a peak We have now made a habitation of the air Such a new dwelling has its own unique time a time that strangely does not agree with the abstracted and or calculated time that was formulated when we only had sundials and water clocks at our disposal Against time as measure and against time as inner temporal phenomenon comes time as total instability Can revisiting the few fragments that Pyrrho and his disciple left us help once again articulate our relation to time and give us a renewed sense of reality and who we are within it This monograph focuses on early Pyrrhonism as distinguished from the sceptical work of Sextus Empiricus Pali Buddhism as well as contemporary interpretations of time and reality in both science and philosophy

**The Field Guide to Understanding 'Human Error'** Sidney Dekker, 2017-11-01 When faced with a human error problem you may be tempted to ask Why didn't these people watch out better Or How can I get my people more engaged in safety You might think you can solve your safety problems by telling your people to be more careful by reprimanding the miscreants by issuing a new rule or procedure and demanding compliance These are all expressions of The Bad Apple Theory where you believe your system is basically safe if it were not for those few unreliable people in it Building on its successful predecessors the third edition of The Field Guide to Understanding Human Error will help you understand a new way of dealing with a perceived human error problem in your organization It will help you trace how your organization juggles inherent trade offs between safety and other pressures and expectations suggesting that you are not the custodian of an already safe system It will encourage you to start looking more closely at the performance that others may still call human error allowing you to discover how your people create safety through practice at all levels of your organization mostly successfully under the pressure of resource constraints and multiple conflicting goals The Field Guide to Understanding Human Error will help you understand how to move beyond human error how to understand accidents how to do better investigations how to understand and improve your safety work You will be invited to think creatively and differently about the safety issues you and your organization face In each you will find possibilities for a new language for different concepts and for new leverage points to influence your own thinking and

practice as well as that of your colleagues and organization If you are faced with a human error problem abandon the fallacy of a quick fix Read this book *Energy Manual* Manfred Hegger, Matthias Fuchs, Thomas Stark, Martin Zeumer, 2012-12-10
